Myzskowski, 2012-12-06 This book contains the proceedings of the 11th Eurographics Workshop on Rendering which took
place from the 25 to the 27th of June 2001 in London United Kingdom Over the past 11 years the workshop has become the
premier forum dedicated to research in rendering Much of the work in rendering now appearing in other conferences and
journals builds on ideas originally presented at the workshop This year we received a total of 74 submissions Each paper was
carefully reviewed by two of the 28 international programme committee members as well as external reviewers selected by
the co chairs from a pool of 125 individuals In this review process all submissions and reviews were handled electronically
with the exception of videos submitted with a few of the papers The overall quality of the submissions was exceptionally high
Space and time constraints forced the committee to make some difficult decisions In the end 29 by papers were accepted and
they appear here Almost all papers are accompanied color images which appear at the end of the book The papers treat the
following varied topics methods for local and global illumination techniques for acquisition and modeling from images image
based rendering new image representations hardware assisted methods shadow algorithms visibility perception texturing
and filtering Each year in addition to the reviewed contributions the workshop includes invited presentations from
internationally recognized experts *Computer Graphics* Michael Cohen, 1998-01-01 Accompanying video contains

disciplines each with their own series of workshops conferences and journals But clearly both disciplines overlap which led to
the idea of composing a book on Geometric Modeling for Scientific Visualization The editors received 39 submissions of high
