Sight Unseen:

Sight Unseen Georgina Kleege, 1999-03-11 This elegantly written book offers an unexpected and unprecedented account of blindness and sight. Legally blind since the age of eleven, Georgina Kleege draws on her experiences to offer a detailed testimony of visual impairment: both her own view of the world and the world's view of the blind. I hope to turn the reader's gaze outward to say not only "Here's what I see" but also "Here's what you see" to show both what's unique and what's universal. Kleege writes. Kleege describes the negative social status of the blind, analyzes stereotypes of the blind that have been perpetuated by movies, and discusses how blindness has been portrayed in literature. She vividly conveys the visual experience of someone with severely impaired sight and explains what she can see and what she cannot and how her inability to achieve eye contact in a society that prizes that form of connection has affected her. Finally, she tells of the various ways she reads and the freedom she felt when she stopped concealing her blindness and acquired skills such as reading braille as part of a new blind identity. Without sentimentality or cliché, Kleege offers us the opportunity to imagine life without sight.

Other Impossibilities Milton E. Brener, 2011-06-09 The goal of the aliens among us is not the study of Earth for purely academic purposes. It is something more vital to the aliens and more portentous for us. The picture that emerges from much research makes sense of several aspects of the alien presence previously quite puzzling. They apparently are a dying race inhabiting a dying planet. They have undoubtedly mastered physical forces and phenomena of which we have not even dreamed. But it has come at a terrible cost. Their emotional life has been all but lost, existing only as a faint remnant from a long distant past. They may pity our hopelessly primitive technology but they envy us our robust emotional life. Like all living things everywhere, they live for the perpetuation of their genes. They do not hate us nor do they seek our destruction. They seek to create a race of hybrids combining their scientifically superior minds with our rich emotional makeup. The ridicule of the entire subject by the government and other forces fearful of upheaval in our society has aggravated the suffering of those chosen and victimized by the aliens who apparently seek ineptly, sometimes to minimize it. The author combines this scholarly

approach with an almost folksy narrative style to make *Walking Through Walls* a very readable and approachable treatise on the phenomena as good as any book on the subject and far more skillfully written than most including those Brener has referenced most frequently Bud Hopkins *Intruders* and Philip Corso's *The Day after Roswell* **Blue Ink Review** **New York Magazine**, 1992-03-09 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea *Sight Unseen* Donald Margulies, 1992 *New York Magazine*, 1992-03-09 New York magazine was born in 1968 after a run as an insert of the New York Herald Tribune and quickly made a place for itself as the trusted resource for readers across the country With award winning writing and photography covering everything from politics and food to theater and fashion the magazine's consistent mission has been to reflect back to its audience the energy and excitement of the city itself while celebrating New York as both a place and an idea *Sight Unseen* Melvyn Goodale, David Milner, 2013-06-27 Vision more than any other sense dominates our mental life Our conscious visual experience of the world is so rich and detailed that we can hardly distinguish it from the real thing But as Goodale and Milner make clear in their prize winning book *Sight Unseen* our visual experience of the world is not all there is to vision Some of the most important things that vision does for us never reach our consciousness at all In this updated and extended new edition Goodale and Milner explore one of the most extraordinary neurological cases of recent years one that profoundly changed scientific views on the visual brain It is the story of Dee Fletcher a young woman who became blind to shape and form as a result of brain damage Dee was left unable to recognize objects or even tell one simple geometric shape from another As events unfolded however Goodale and Milner found that Dee wasn't in fact blind she just didn't know that she could see They showed for example that Dee could reach out and grasp objects with amazing dexterity despite being unable to perceive their shape size or orientation Taking us on a journey into the unconscious brain the two scientists who made this incredible discovery tell the amazing story of their work and the surprising conclusion they were forced to reach Written to be accessible to students and popular science readers this book is a fascinating illustration of the power of the unconscious mind *Sight Unseen/The Confession* Mary Roberts Rinehart, 2001-04 In *Sight Unseen* the Neighborhood Club a group of six friends decide to hold a séance for fun only to have a blood curdling crime reenacted before their eyes Soon they are hot on the trail of a murderer The *Confession* is a grim but powerful portrait of a woman's guilt depression and mental breakdown **Federal Register**, 2013-09 *Lost in the Blizzard* Paul Hutchens, 1998-02-01 The tales and travels of the Sugar Creek Gang have passed the test of time delighting young readers for more than fifty years Great mysteries with a message The Sugar Creek Gang series chronicles the faith building adventures of a group of fun loving courageous Christian boys Your kids will be thrilled chilled
