In the twilight's embrace, where dreams reside,
A symphony of stars, a celestial tide,
With hearts of starlight, we're woven as one,
Bound by the echoes of love, never undone.

And the cherry blossoms, blooming with grace,
Whispers of secrets dancing in their embrace,
Their years unfold, a tapestry of light,
As moonlight's embrace joins the midnight choir.

Make The Best Of It

John Bunyan

Make The Best Of It:

Software Management Donald J. Reifer, 2006-08-30 This Seventh Edition of Donald Reifer's popular bestselling tutorial summarizes what software project managers need to know to be successful on the job. The text provides pointers and approaches to deal with the issues, challenges, and experiences that shape their thoughts and performance. To accomplish its goals, the volume explores recent advances in dissimilar fields such as management theory, acquisition management, globalization, knowledge management, licensing, motivation theory, process improvement, organization dynamics, subcontract management, and technology transfer. Software Management provides software managers at all levels of the organization with the information they need to know to develop their software engineering management strategies for now and the future. The book provides insight into management tools and techniques that work in practice. It also provides sufficient instructional materials to serve as a text for a course in software management. This new edition achieves a balance between theory and practical experience. Reifer systematically addresses the skills, knowledge, and abilities that software managers at any level of experience need to have to practice their profession effectively. This book contains original articles by leaders in the software management field, written specifically for this tutorial, as well as a collection of applicable reprints. About forty percent of the material in this edition has been produced specifically for the tutorial.

Contents: Introduction, Life Cycle Models, Process Improvement, Project Management Planning Fundamentals, Software Estimating, Organizing for Success, Staffing Essentials, Direction Advice, Visibility and Control, Software Risk Management, Metrics and Measurement, Acquisition Management, Emerging Management Topics. The challenges faced by software project managers are the gap between what the customers can envision and the reality on the ground and how to deal with the risks associated with this gap in delivering a product that meets requirements on time and schedule at the target costs. This tutorial hits the mark by providing project managers, practitioners, and educators with source materials on how project managers can effectively deal with this risk.

Dr. Kenneth E. Nidiffer, Systems Software Consortium, Inc. The volume has evolved into a solid set of foundation works for anyone trying to practice software management in a world that is increasingly dependent on software release quality, timeliness, and productivity.
