Adult Crying Ad J.J.M. Vingerhoets, Randolph R. Cornelius, 2012-12-06 Crying is a typical human expression of emotion Surprisingly until now little scientific attention has been devoted to this phenomenon Many textbooks on emotion fail to pay attention to it and in scientific journals there are hardly any contributions focusing on this behavior In contrast there is much interest from the lay public allowing pseudo scientists to formulate theories that have little or no scientific basis Is there any evidence in support of statements that crying is healthy or that not crying may result in toxification How do people react to the crying of others Is crying important for the diagnosis of depression and if so how This book aims to fill this gap in scientific literature Crying is discussed from several perspectives and specific attention is given to methodological issues and assessment Each chapter provides a review and a summary of the relevant scientific literature

**Why Only Humans Weep** Ad Vingerhoets, 2013-02-28 Crying has fascinated mankind for millennia Since ancient times we have known that emotional tears are a unique human characteristic Unsurprisingly over hundreds of years scholars from different backgrounds have speculated about the origin and functions of human tears According to Charles Darwin tears fulfilled no adaptive function And yet this seems in sharp contrast to statements in the popular media about the significance of crying Crying is thought to bring relief and is considered healthy and withholding tears unhealthy In addition tears have been said to inhibit aggression in assaulters and to promote social bonding Perhaps that could explain why tears have been so important in our evolution Ad Vingerhoets is one of the few scientists in the world to have studied crying He examines in *Why only humans weep* which claims about crying are scientifically tenable which are fact and which are fiction Though a psychologist he doesn't just restrict himself to the current psychological literature but also explores work in evolutionary biology neurosciences theology art history and anthropology to provide an integrated perspective on this complex phenomenon Written throughout in an academically accessible style this book is groundbreaking in contributing to a modern scientific understanding of crying It will have broad appeal to psychologists psychiatrists philosophers biologists and anthropologists

*Father Nature* James K. Rilling,2024-10-01 How and why human males evolved the capacity to be highly involved caregivers and why some are more involved than others We all know the importance of mothers They are typically as paramount in the wild as they are in human relationships But what about fathers In most mammals including our closest living primate relatives fathers have little to no involvement in raising their offspring and sometimes even kill the offspring sired by other fathers How then can we explain modern fathers having the capacity to be highly engaged parents In *Father Nature* James Rilling explores how humans have evolved to endow modern fathers with this potential and considers why this capacity evolved in humans Paternal caregiving is advantageous to children and by extension to society at large yet variable both across and within human societies Rilling considers how to explain this variability and what social and policy changes might be implemented to increase positive paternal involvement Along the way *Father Nature* also covers the impact fathers have on children s development the evolution of paternal caregiving how natural selection adapted male physiology for caregiving and finally what lessons an expecting father can take away from the book as well as what benefits they themselves get from raising children including increased longevity and younger brains A beautifully written book by a father himself *Father Nature* is a much needed and deeply rewarding look at the science behind good paternal behavior in humans
