Making Up Our Mind Sigal R. Ben-Porath, Michael C. Johanek, 2019-04-24 If free market advocates had total control over education policy would the shared public system of education collapse Would school choice revitalize schooling with its innovative force With proliferating charters and voucher schemes would the United States finally make a dramatic break with its past and expand parental choice Those are not only the wrong questions they're the wrong premises argue philosopher Sigal R Ben Porath and

historian Michael C. Johanek in *Making Up Our Mind* Market driven school choices aren't new. They predate the republic and for generations parents have chosen to educate their children through an evolving mix of publicly supported private, charitable and entrepreneurial enterprises. The question is not whether to have school choice. It is how we will regulate who has which choices in our mixed market for schooling and what we as a nation hope to accomplish with that mix of choices. Looking beyond the simplistic divide between those who oppose government intervention and those who support public education, the authors make the case for a structured landscape of choice in schooling, one that protects the interests of children and of society while also identifying key shared values on which a broadly acceptable policy could rest.

Making Up the Difference Erynn Masi de Casanova, 2011-06-01 Globalization and economic restructuring have decimated formal jobs in developing countries, pushing many women into informal employment such as direct selling of cosmetics, perfume and other personal care products as a way to make up the difference between household income and expenses. In Ecuador, with its persistent economic crisis and few opportunities for financially and personally rewarding work, women increasingly choose direct selling as a way to earn income by activating their social networks. While few women earn the cars and trips that are iconic prizes in the direct selling organization, many use direct selling as part of a set of household survival strategies. In this first in-depth study of a cosmetics direct selling organization in Latin America, Erynn Masi de Casanova explores women's identities as workers, including their juggling of paid work and domestic responsibilities, their ideas about professional appearance and their strategies for collecting money from customers. Focusing on women who work for the country's leading direct selling organization, she offers fascinating portraits of the everyday lives of women selling personal care products in Ecuador's largest city, Guayaquil. Addressing gender relations, including a look at men's direct and indirect involvement, the importance of image and the social and economic context of direct selling, Casanova challenges assumptions that this kind of flexible employment resolves women's work-home conflicts and offers an important new perspective on women's work in developing countries.
