Making Democracy Work Better Mediating Structures Social Capital And The Democratic Prospect:

Making Democracy Work Better Richard A. Couto, 2003-07-11 The decade of the 1980s marked a triumph for market capitalism. As politicians of all stripes sought to reinvent government in the image of private enterprise, they looked to the voluntary sector for allies to assuage the human costs of reductions in public policies of social welfare. This book details the savage side of market capitalism in Appalachia and explains the social, political, and economic roles that mediating structures play in mitigating it. Profiling the work of twenty-three such mediating structures—community-based organizations that battled to provide social safety nets, fight environmental assaults, and upgrade the education and job skills of Appalachian residents—Richard Couto distills the practical lessons to be found in their successes and shortcomings. Couto argues that a broader set of democratic dimensions be used in taking the measure of civil society and public policy in the twenty-first century. He shows that mediating structures promote the democratic prospect of reduced inequality and increased communal bonds when they provide and advocate for new forms and increased amounts of social capital, the public goods and moral resources that we invest in one another as members of a community.

Participatory Democracy versus Elitist Democracy: Lessons from Brazil W. Nylen, L. Dodd, 2015-12-22 William Nylen begins by discussing North Americans' love-hate relationship with politics and politicians, then shows how Brazilians feel the same way as do many citizens of democracies throughout the world. He argues that this is so because contemporary democracies have increasingly trickled up and away from so-called average citizens. We now live in a world of elitist democracies essentially constructed by and for moneyed, well-connected, and ethically challenged elites. Fortunately, there are alternatives, and that's where Brazil offers valuable lessons. Experiments in local-level participatory democracy put into practice in Brazil by the Workers' Party show both the promise and the practical limitations of efforts to promote popular participation and citizen empowerment.

Race, Neighborhoods, and the Misuse of Social Capital J. Jennings, 2007-05-28 This anthology tackles three key issues: how social capital is discussed within the contexts of racial inequality; how this dialogue informs public policy regarding neighbourhood revitalization and economic development; and how effective a strategy of utilization of social capital is for improving inner-city living conditions.

Professionals *Collective Courage* Jessica Gordon Nembhard, 2024-11-26 First published in 2014 Jessica Gordon Nembhard's *Collective Courage* quickly became an important tool for understanding the history of cooperative economic enterprises in the African American community. This now classic work recounts how African Americans benefited greatly from cooperative ownership and democratic economic participation throughout the nation's history. Many of the players in this story are well known among them W E B Du Bois, A Philip Randolph and the Ladies Auxiliary to the Brotherhood of Sleeping Car Porters, Nannie Helen Burroughs, Fannie Lou Hamer, Ella Jo Baker and George Schuyler of the Young Negroes Co-operative League, the Federation of Southern Cooperatives and the Black Panther Party. Drawing on media reports and co-op records, Gordon Nembhard uncovers the challenges they faced and highlights their hard won victories. This tenth anniversary edition of *Collective Courage* features a substantial preface that expands on material in the first edition and addresses the development of the Black co-op movement through the second decade of the twenty-first century. It remains an indispensable resource for readers interested in the history of the struggle for African American economic freedom and equity.

Transforming Places Stephen L. Fisher, Barbara Ellen Smith, 2012-03-15 In this era of globalization's ruthless deracination, place attachments have become increasingly salient in collective mobilizations across the spectrum of politics. Like place-based activists in other resource-rich yet impoverished regions across the globe, Appalachians are contesting economic injustice, environmental degradation and the anti-democratic power of elites. This collection of seventeen original essays by scholars and activists from a variety of backgrounds explores this wide range of oppositional politics, querying its successes, limitations and impacts. The editors' critical introduction and conclusion integrate theories of place and space with analyses of organizations and events discussed by contributors. *Transforming Places* illuminates widely relevant lessons about building coalitions and movements with sufficient strength to challenge corporate-driven globalization.
