Exchange for the Flower, Nursery and Garden Center Trade ,1925 **Greenhouse horticulture** Cecilia Stanghellini, Bert Van 't Ooster, Ep Heuvelink, 2025-07-28 Greenhouse horticulture is an easy to read textbook for all those interested in protected cultivation from university students and teachers to professional advisers in the field and managers of horticultural companies This book provides an integrated approach to crop growth and development and the technical aspects of greenhouse cultivation and climate management It combines an analysis of the relationship between crop

production and ambient climate with an explanation of the processes that determine the climate in a protected environment. With the ability to modify the environment comes the need for growers to strike a balance between the costs and benefits of technology. This book outlines the methods and gives several examples of how to make optimal choices about technology. Sustainable management of shoot and root environment is discussed as well as the pros and cons of vertical farming. The processes addressed in this book like crop growth energy balance and mass exchange apply to any kind of greenhouse. Therefore in spite of the word technology this is not a book about high tech greenhouses only.
