its own meaning from the myriad of potential body symbolisms Bodies as Sites of Cultural Reflection in Early Childhood Education uses empirical examples from qualitative fieldwork conducted in New Zealand and Japan to explore these theories and discuss the ways in which children s bodies represent a central focus in teachers pedagogical discussions and create contexts for the embodiment of children's experiences in the early years Promoting Positive Development in Early Childhood Karen VanderVen, 2008-09-08 This new volume in the Search Institute Series on Developmentally Attentive Community and Society represents a milestone in Search Institute's signature work on the Developmental Assets that children and adolescents need in their lives to succeed Through the research behind this book Karen VanderVen links this strength based community based approach to human development to early childhood development and practice In doing so she advances a lo term vision of understanding child and adolescent development not merely as a series of discrete stages but as a trajectory of development in which experiences in each phase of development link to reinforce or redirect experiences in other aspects of life To be sure VanderVen explores with both breadth and depth a parti larly critical time in child development the early childhood years ages 3 5 The latest research in numerous elds has only increased our understanding of how important it is for communities to attend to children's developmental expe ences in these crucial years Positive development in early childhood leads young people on a path to a healthy adulthood and a lack of positive dev opment in early childhood has a blunting effect that extends into elementary and secondary schooling years
