making for quick and easy reference *Cancers of the Mouth and Throat* William M. Lydiatt, MD, Perry Johnson, 2012-09-01 William Lydiatt M D and Perry Johnson M D have worked with hundreds of mouth and throat cancer patients They understand the emotional turmoil patients and their families go through after a cancer diagnosis and they know how being informed can relieve some of that stress Topics covered in this book include how early detection leads to high cure rates symptoms that could mean cancer the emotional side of the cancer how doctors make a diagnosis staging the cancer and why it is so important surgery radiation and chemotherapy how they kill cancer reconstructive surgery and experimental treatment through clinical trials **White Blood: Personal Journeys With Childhood Leukaemia** Mel Greaves, 2008-08-06 There are countless academic books on the subject of childhood leukemia The idea behind this book however is very different Here we look at the extraordinary story of childhood leukemia from very distinct and unique perspectives a distinguished physician who has lived through the transition of the disease from despair to success and who played a key role in the latter a distinguished laboratory scientist who has helped breach the barrenness of biological ignorance of the disease to reveal its nature a patient who has been confronted with the tough realities of the illness and has been cured and parents who have been given the worst possible news that their child is diagnosed with leukemia and who have endured the prolonged treatment hope and despair or relief that follows These individuals recount their personal experiences challenges and interactions with the disease in ways that complement and contrast with each other Thus not only does the book contain extraordinary stories involving the very best of biomedical research and clinical advances but it also embodies very human tales of resilience optimism and courage *Ever Since Adam and Eve* Malcolm Potts, Roger Short, 1999-02-14 A lively and entertaining account of the broad panorama of human sexual behaviour which reveals our actions to be an inextricable mixture of nature and nurture a combination of innate actions evolved over the millennia overlain by more recent cultural constraints imposed by civilization
