Smiley, 2018-04-03 An in depth look at the urban environments of Houston and Copenhagen How are modern cities changing and what implications do those changes have for city inhabitants What kinds of cities do people want to live in and what cities do people want to create in the future Michael Oluf Emerson and Kevin T Smiley argue that western cities have diverged into two specific and different types market cities and people cities Market cities are focused on wealth jobs individualism and economic opportunities People cities are more egalitarian with government investment in infrastructure and an active civil society Analyzing the practices and policies of cities with two separate foci markets or people has substantial implications both for everyday residents and future urban planning and city development Market Cities People Cities examines these diverging trends through extended case studies of Houston Texas as a market city and Copenhagen Denmark as a people city and draw on data from nearly 100 other cities Emerson and Smiley track the history of how these two types of cities have been created and how they function for governments and residents in various ways examining transportation the environment and inequality among other topics Market Cities People Cities also outlines the means and policies cities can adapt in order to become more of a market or people focused city The afterword reflects on Houston s response to the devastation caused by Hurricane Harvey in 2017 As twenty first century cities diverge Market Cities People Cities is essential for urban dwellers anxious to be active in their pursuit of their best cities as well as anyone looking to the future of cities around the world

institutions in the developing world the need for a genuine urban renaissance in Britain and elsewhere and the suffering of the homeless These controversial and sometimes conflicting essays linked by Richard Scholar s incisive introduction aim to encourage and inform debate about the challenges to human rights in our increasingly urban world **City Power** Richard C. Schragger,2016 Reigning theories of urban power suggest that in a world dominated by footloose transnational capital cities have little capacity to effect social change In *City Power* Richard Schragger challenges this conventional wisdom arguing that cities can and should pursue aims other than making themselves attractive to global capital Using the municipal living wage movement as an example Schragger explains why cities are well positioned to address issues like income equality and how our institutions can be designed to allow them to do so Healthy Cities Namir Khan,Willem H. Vanderburg,2001 Modern cities can be designed to constitute a more supportive environment for a great many activities provide a more livable habitat and reduce the burden imposed on the biosphere They can be made healthier in terms of the definition by World Health Organization and more sustainable by means of new and emerging preventive approaches *Healthy Cities* focuses on those preventive approaches that can make cities healthier and more sustainable This book as well as the two companion volumes *Sustainable Energy* and *Sustainable Production* is the result of a twelve year research project carried out at the Center for Technology and Social Development at the University of Toronto The research findings led to the development of a new conceptual framework and strategy aimed at converting technological and economic growth into development that would gradually become more sustainable **Restarting the Future** Jonathan Haskel,Stian Westlake,2022-03-22 From the acclaimed authors of *Capitalism without Capital* radical ideas for restoring prosperity in today s intangible economy The past two decades have witnessed sluggish economic growth mounting inequality dysfunctional competition and a host of other ills that have left people wondering what has happened to the future they were promised *Restarting the Future* reveals how these problems arise from a failure to develop the institutions demanded by an economy now reliant on intangible capital such as ideas relationships brands and knowledge In this groundbreaking and provocative book Jonathan Haskel and Stian Westlake argue that the great economic disappointment of the century is the result of an incomplete transition from an economy based on physical capital and show how the vital institutions that underpin our economy remain geared to an outmoded way of doing business The growth of intangible investment has slowed significantly in recent years making the world poorer less fair and more vulnerable to existential threats Haskel and Westlake present exciting new ideas to help us catch up with the intangible revolution offering a road map for how to finance businesses improve our cities fund more science and research reform monetary policy and reshape intellectual property rules for the better Drawing on Haskel and Westlake s experience at the forefront of finance and economic policymaking *Restarting the Future* sets out a host of radical but practical solutions that can lead us into the future *Disposable Cities* Garth Andrew Myers,2017-03-02 Based on in depth fieldwork in three cities Dar es Salaam Zanzibar and Lusaka this book provides a critical analysis of the United Nations

Sustainable Cities Program in Africa SCP Focusing on the SCP's policies for solid waste management which was identified as the top priority problem by the SCP the book examines the success of these pilot schemes and the SCP's record in building new relationships between people and government It argues that the SCP has operated in a political vacuum without recognition of the long and problematic histories and cultural politics of urban environmental governance in Eastern and Southern Africa This book brings these cultural and political histories to the fore in its examination of the contemporary dynamics In doing so it not only provides an insightful analysis of the policies and outcomes for the SCP but also puts forward a historically grounded critique of neoliberalism good governance and sustainable development discourses *Cities in Relations* Ola Söderström, 2014-03-19 *Cities in Relations* advances a novel way of thinking about urban transformation by focusing on transnational relations in the least developed countries Examines the last 20 years of urban development in Hanoi Vietnam and in Ouagadougou Burkina Faso Considers the ways in which a city's relationships with other places influences its urban development Provides fresh ideas for comparative urban studies that move beyond discussions of economic and policy factors Offers a clear and concise narrative accompanied by more than 45 photos and maps
