Diane Larsen-Freeman, Marti Anderson, 2013-01-18 Techniques and Principles in Language Teaching has influenced the way thousands of teachers have taught English. This classic guide to developing the way you teach has been an essential resource to new and experienced teachers worldwide and is now in its third edition. New features of the third edition include a new discussion on the political dimensions of language teaching, a new digital technology chapter, and extended coverage of content-based and task-based approaches. On this site, you will find additional resources including author videos in which Diane Larsen-Freeman and Marti Anderson talk about the background to the book and new innovations in language teaching which are discussed in the third edition. **Processing**

**Instruction** Bill VanPatten, 2004-05-20 This new book Processing Instruction: Theory, Research, and Commentary, edited by Bill VanPatten, a pioneer in processing instruction (PI), is a refreshing presentation of 10 related and not widely available articles that illustrate the role of processing instruction in second language acquisition. The articles provide both historical and current context as well as describe the influence of the input processing model on PI. The contents include empirical papers presenting new data that demonstrate both the theoretical and pedagogical threads of research. Aside from simply establishing where PI stands in the field of instructed SLA, the book addresses issues such as processing instruction versus other types of instruction, the impact of processing instruction on various linguistic structures, the role of explicit information in instructional intervention, and the long-term effects of processing instruction. Each section of the book is highlighted by commentaries from noted researchers in instructed SLA. An attempt was made to include voices that offer critical perspectives on various issues of PI research. The book achieves an unusually balanced approach to a subject that has stirred debate in the field. Processing Instruction: Theory, Research, and Commentary will serve as an important source of information regarding research methodology and replication in second language acquisition. It will also be useful in graduate courses where students need exposure to research design and is especially useful for illustrating the usefulness of replication in SLA research.

Approaches and Methods in Language Teaching Jack C. Richards, Theodore S. Rodgers, 2014-04-16 In addition, this third edition includes content on the teaching and learning environment with chapters on learners and methods, teachers and methods, plus approaches, methods, and the curriculum. **Input Processing and Processing Instruction** Alessandro Benati, 2021-09-08

Input Processing is a theoretical framework on which the pedagogical paradigm called Processing Instruction is predicated. In this book, new data on the acquisition of Italian and Modern Standard Arabic are presented and analyzed within this framework. Each study in the book explores how input processing strategies affect the acquisition of a particular linguistic feature and/or structure in the two languages. The studies use both offline e.g. sentence and discourse level tasks and online tests e.g. eye tracking to measure the effects of this instructional training. **Practices in**
