Making Education Work Cláudio de Moura Castro, Aimee E. Verdisco, 2002      *The International Handbook of Educational Research in the Asia-Pacific Region* J.P. Keeves, Ryo Watanabe, 2013-11-11 The aim of the Handbook is to present readily accessible but scholarly sources of information about educational research in the Asia Pacific region The scale and scope of the Handbook is such that the articles included in it provide substantive contributions to knowledge and understanding of education in the Asia region In so doing the articles present the problems and issues facing education in the region and the findings of research conducted within the region that contribute to the resolution of these problems and issues Moreover since new problems and issues are constantly arising the articles in the Handbook also indicate the likely directions of future developments The different articles within the Handbook seek to conceptualize the problems in each specific content area under review provide an integration of the research conducted within that area the theoretical basis of the research the practical implications of the research and the contribution of the research towards the resolution of the problems identified Thus the articles do not involve the reporting of newly conducted research but rather require a synthesis of the research undertaken in a particular area with reference to the research methods employed and the theoretical frameworks on which the research is based In general the articles do not advocate a single point of view but rather present alternative points of view and comment on the debate and disagreements associated with the conduct and findings of the research Furthermore it should be noted that the Handbook is not concerned with research methodology and only considers the methods employed in inquiry in so far as the particular methods of research contribute to the effective investigation of problems and issues that have arisen in the conduct and provision of education at different levels within the region

institutions are biased against it This book however shows how the strategic choices of reform proponents alter the destinies of policy reforms by reshaping power equations and undermining institutional biases that impede change In many countries the political path to reform can be daunting Antireform interests are powerful and support for change is at best lukewarm Centrally important institutions strongly defend the policy status quo Despite these political odds reformers have seized the initiative in promoting reform weakening and marginalizing opposition groups and marshaling political patrons and networks to advance their initiatives Despite the Odds opens the black box of decision making in five initiatives designed to enhance the quality of education services in Latin America The book addresses the strategies used by reformers to manage the political process of change and those adopted by opposition groups and institutions resisting their efforts Individual chapters consider how leaders set national policy agendas for education how policy design teams created the content of reform initiatives how they dealt with the messy and public confrontations that greeted reform proposals when they were announced and the carryover of political conflict when they were implemented
