Stephen H. Kendall, John R. Dale, 2023-03-31 This book offers for the first time access to the chronological arc of John Habraken's writing in a single collection. Few architects or scholars have so consistently and patiently pursued such a humane and culturally vital set of radical questions related to the behaviour of the built environment as John Habraken. From the publication of his first book in 1960 he has quietly helped redraw the map of architectural research, education, practice, design methods and theory. His insights lead us to a better understanding of how the built field works, contributing to the development of methods enabling professionals to contribute to its coherence and resilience. Following an introductory essay by the editors placing Habraken's work in context, this collection is organized in two sections and further organized around a number of specific themes: The Built Field, Role of the Architect, Control, Sharing, Forms, Examples of Ways of Doing, Open Building, Tools and Cultivating the Built Environment. A series of interviews with the author enable him to reflect on his journey of inquiry, research, advocacy and teaching, and the relationship between ways of seeing and ways of doing. Offering theoretical perspectives and methodological ways forward, this book will be of interest to architects, planners and urban designers tackling the challenges of the contemporary built environment that Habraken identifies, as well as educators and students.

**The Art of City Making** Charles Landry, 2012-05-16 City making is an art, not a formula. The skills required to re-enchant the city are far wider than the conventional ones like architecture, engineering and land use planning. There is no simplistic ten-point plan, but strong

principles can help send good city making on its way The vision for 21st century cities must be to be the most imaginative cities for the world rather than in the world This one change of word from in to for gives city making an ethical foundation and value base It helps cities become places of solidarity where the relations between the individual the group outsiders to the city and the planet are in better alignment Following the widespread success of *The Creative City* this new book aided by international case studies explains how to reassess urban potential so that cities can strengthen their identity and adapt to the changing global terms of trade and mass migration It explores the deeper fault lines paradoxes and strategic dilemmas that make creating the good city so difficult     Streamlining Local Regulations Stuart S. Hershey, Carolyn Garmise, 1983
