Sensor Systems and Software Stephen Hailes, Sabrina Sicari, George Roussos, 2010-01-13 The First International ICST Conference on Sensor Systems and Software S cube 2009 was held during 7-8 September in Pisa Italy This new international conference was dedicated to addressing the research challenges facing system development and software support for systems based on wireless sensor networks WSNs that have the potential to impact society in many ways Currently wireless sensor networks introduce innovative and interesting application scenarios that may support a large amount of different applications including environmental monitoring disaster prevention building automation object tracking nuclear reactor control fire detection agriculture healthcare and traffic monitoring The widespread acceptance of these new services can be improved by the definition of frameworks and architectures that have the potential to radically simplify software development for wireless sensor network based applications The aim of these new architectures is to support flexible scalable programming of applications based on adaptive middleware As a consequence WSNs require novel programming paradigms and technologies Moreover the design of new complex systems characterized by the interaction of different and heterogeneous resources will allow the development of innovative applications that meet high performance

goals Hence WSNs require contributions from many fields such as embedded systems distributed systems data management system security and applications The conference places emphasis on layers well above the traditional MAC and routing and transport layer protocols

Medical-Grade Software Development Ilkka Juuso, Ilpo Pöyhönen, 2023-11-13 This book is a practical guide to meeting IEC 62304 software development requirements within the context of an ISO 13485 quality management system QMS The book proves this can be done with a minimum amount of friction overlap and back and forth between development stages It essentially shows you how you should shape your medical software development processes to fit in with the QMS processes in the smartest and leanest way possible By following the advice in this book you can reuse processes from your QMS ensure your product realization processes meet the requirements for medical software development and marry all the requirements together using tried and tested solutions into one efficient system The expertise of the authors here goes beyond just the experiences of one real world project as they tap into over 30 years of experience and countless software and software assessment projects to distill their advice The book takes a hands on approach by first teaching you the top 25 lessons to know before starting to develop a process for medical software development It then walks you through the expectations placed on the key aspects of such a process by the key standards The book progresses from an overview of both standards and the general requirements involved to a detailed discussion of the expected stages from software development and maintenance to risk management configuration management and problem resolution The book provides insightful advice on how the requirements of the IEC 62304 software development life cycle can be married with an ISO 13485 QMS how the development of the technical file should be organized and how to address conformity assessment the daily after approval and the recent trends that will affect the industry in the coming years The book is modeled after the IEC 62304 standard and adopts its clause structure in the numbering of sections for easy reference The book does not attempt to replicate either standard For the ISO 13485 standard it recites the necessary requirements succinctly For IEC 62304 the discussion is in depth and also addresses the impact of ISO 13485 on the requirements discussed In this way the book drills into both standards to expose the core of each requirement and shape these into a practical cohesive workflow for developing maintaining and improving a Lean software development pipeline
