Making Of Britain 2 Life Work Between:

Anglo-Chinese Encounters Before the Opium War Xin Liu, 2022-08-12 *Anglo Chinese Encounters Before the Opium War A Tale of Two Empires Over Two Centuries* studies the fascinating encounters between the two historic empires from Queen Elizabeth I's first letter to the Ming Emperor Wanli in 1583 to Lord Palmerston's letter to the Minister of China in 1840. Starting with Queen Elizabeth I's letter to the Chinese Emperor and ending with the letter from Lord Palmerston to the Minister of China just before the Opium War, this book explores the long journey in between from cultural diplomacy to gunboat diplomacy. It interweaves the most known diplomatic efforts at the official level with the much unknown intellectual interactions at the people-to-people level from missionaries to scholars from merchants to travelers and from artists to scientists. This book adopts a novel mirror approach by pairing and comparing people, texts, commodities, artworks, architecture, ideologies, operating systems, and world views of the two empires. Using letters, gifts, and traded goods as fulcrums and by adopting these unique lenses, it puts China into the world history narratives to contextualise Anglo-Chinese relations, thus providing a fresh analysis of the surviving evidence. Xin Liu casts a new light on understanding the Sino-centric and Anglo-centric world views in driving the complex relations between the two empires and the reversals of power shifts that are still unfolding today. The book is not intended for specialists in history but a general audience wishing to learn more about China's historical engagement with the world.

The Salem Witch Trials Marilynne K. Roach, 2004 *The Salem Witch Trials* is based on over twenty-five years of archival research, including the author's discovery of previously unknown documents, newly found cases, and court records. From January 1692 to January 1697, this history unfolds a nearly day-by-day narrative of the crisis as the citizens of New England experienced it.

Teaching History, 1969 *The Making of Sporting Cultures* John Hughson, 2013-09-13 *The Making of Sporting Cultures* presents an analysis of western sport by examining how the collective passions and feelings of people have contributed to the making of sport as a way of life. The popularity of sport is so pronounced in some cases that we speak of certain sports as national pastimes. Baseball in the United States, soccer in Britain, and cricket in the Caribbean are among the relevant examples discussed. Rather than regarding the historical development of sport as the outcome of passive spectator reception, this work is interested in how sporting cultures have been made and developed over time through the active engagement of its enthusiasts. This is to study the history of sport not only from below but also from within as a means to understanding the deep relationship between sport and people within class contexts: the middle class as well as the working class. Contestation over the making of sport along axes of race, gender, and class are discussed where relevant. A range of cultural writers and theorists are examined in regard to both how their writing can help us understand the making of sport and as to how sport might be located within an overall cultural context in different places and times. The book will appeal to students and academics within humanities disciplines such as cultural studies, history, and sociology, and to those in sport studies programmes interested in the historical, cultural, and social

aspects of sport This book was published as a special issue of Sport in Society The Making of Women Trade Unionists Gill Kirton, 2017-03-02 In what will be essential reading for all industrial relations scholars Gill Kirton considers the social construction of women's trade union participation in the context of male dominated trade unions Exploring the making and progress of women's trade union careers this book locates the issues within the context of their experiences of three interlocking social institutions the union work and family The book examines how and why women embark on trade union careers the social processes which shape women's gender and union identities and the combined influences of union work family contexts on the trajectory of women's union careers Additionally the book offers a historical overview of the development of women's trade union education and separate organizing with original analysis and historical data

interviews to explore how this group articulated their wartime experiences and how they positioned themselves in relation to the hegemonic discourse of military masculinity It considers the range of masculine identities circulating amongst civilian male workers during the war and investigates the extent to which reserved workers draw upon these identities when recalling their wartime selves It argues that the Second World War was capable of challenging civilian masculinities positioning the civilian man below that of the soldier hero while simultaneously reinforcing them by bolstering the capacity to provide and to earn high wages frequently in risky and dangerous work all which were key markers of masculinity

The History of the Theory of Structures Karl-Eugen Kurrer, 2012-01-09 This book traces the evolution of theory of structures and strength of materials the development of the geometrical thinking of the Renaissance to become the fundamental engineering science discipline rooted in classical mechanics Starting with the strength experiments of Leonardo da Vinci and Galileo the author examines the emergence of individual structural analysis methods and their formation into theory of structures in the 19th century For the first time a book of this kind outlines the development from classical theory of structures to the structural mechanics and computational mechanics of the 20th century In doing so the author has managed to bring alive the differences between the players with respect to their engineering and scientific profiles and personalities and to create an understanding for the social context Brief insights into common methods of analysis backed up by historical details help the reader gain an understanding of the history of structural mechanics from the standpoint of modern engineering practice A total of 175 brief biographies of important personalities in civil and structural engineering as well as structural mechanics plus an extensive bibliography round off this work

Congressional Record United States. Congress, 1958 *Low-carbon Growth Links with China* Great Britain: Parliament: House of Commons: Energy and Climate Change Committee, 2012-08-29 China is the fastest growing economy in the world and by 2030 could account for half of the world's CO2 emissions It has recently set out ambitious plans to reduce the carbon intensity of its economy boost green energy draft a new climate law and introduce carbon trading MPs say that this is the ideal time for the UK to work together with China both to prepare the ground for a future international agreement and to secure potential opportunities for British businesses in China's burgeoning markets for low carbon technologies currently worth around 430 billion The report warns however that the Government's work in China suffers from a lack of strategic direction There are too many small projects focused on too many different areas rather than a coordinated effort to achieve key objectives tailored to appeal to Chinese priorities and which build on UK strengths For policy this means a focus on carbon pricing and accounting where the UK has experience to offer In the business area this means identifying the potential markets and technologies in which the UK could have a comparative advantage One area in which the UK could establish a comparative advantage with the right Government support is carbon capture and storage CCS technology which could be a substantial export earner if the UK is able to develop CCS expertise early The UK's ability to influence policy in China and to compete for business in low carbon development

Carbon Democracy Timothy Mitchell, 2011-11-05 A brilliant revisionist argument that places oil companies at the heart of 20th century history and of the political and environmental crises we now face Guardian A sweeping overview of the relationship between fossil fuels and political institutions from the industrial revolution to the Arab Spring Financial Times Oil is a curse it is often said that condemns the countries producing it to an existence defined by war corruption and enormous inequality Carbon Democracy tells a more complex story arguing that no nation escapes the political consequences of our collective dependence on oil It shapes the body politic both in regions such as the Middle East which rely upon revenues from oil production and in the places that have the greatest demand for energy Timothy Mitchell begins with the history of coal power to tell a radical new story about the rise of democracy Coal was a source of energy so open to disruption that oligarchies in the West became vulnerable for the first time to mass demands for democracy In the mid twentieth century however the development of cheap and abundant energy from oil most notably from the Middle East offered a means to reduce this vulnerability to democratic pressures The abundance of oil made it possible for the first time in history to reorganize political life around the management of something now called the economy and the promise of its infinite growth The politics of the West became dependent on an undemocratic Middle East In the twenty first century the oil based forms of modern democratic politics have become unsustainable Foreign intervention and military rule are faltering in the Middle East while governments everywhere appear incapable of addressing the crises that threaten to end the age of carbon democracy the disappearance of cheap energy and the carbon fuelled collapse of the ecological order In making the production of energy the central force shaping the democratic age Carbon Democracy rethinks the history of energy the politics of nature the theory of democracy and the place of the Middle East in our common world *The Publishers' Circular and Booksellers' Record*, 1929
