USING PROJECTIVE

TECHNIQUES WITH CHILDREN Louis A. Chandler, Virginia J. Johnson, 1991-01-01 This book demonstrates that content analysis of expressive productions systematically carried out can contribute to the ultimate purpose of clinical assessment: a better understanding of the individual. Several major techniques in personality assessment with children are clearly and concisely presented. In addition, methods are suggested in which those techniques might be used most effectively in understanding children. Major sections include children's drawings, sentence completion tasks, thematic apperception test, children's apperception test, children's play and case studies.

Handbook of Psychology and Health, Volume I Robert J. Gatchel, Andrew Baum, Jerome E. Singer, 2021-09-30 Originally published in 1982, this volume deals with behavioral medicine and clinical psychology. Much of what psychologists had been able to contribute to the study and treatment of health and illness had to this point been derived from clinical research and behavioral treatment. This volume presents some of this work, providing a fairly comprehensive view of the overlap between behavioral medicine and clinical psychology. Its purpose was to present some of the traditional areas of research and practice in clinical psychology that had directly and indirectly contributed to the development of behavioral medicine. Before the birth of behavioral medicine, which subsequently attracted

psychologists from many different areas ranging from social psychology to operant conditioning the chief link between psychology and medicine consisted of the relationship albeit sometimes fragile and tumultuous between clinical psychology and psychiatry Many of the behavioral assessment and treatment methods now being employed in the field of behavioral medicine were originally developed in the discipline of clinical psychology
