Hemminger, 2021-09-22 The study of religion by the humanities and social sciences has become receptive for an evolutionary perspective Some proposals model the evolution of religion in Darwinian terms or construct a synergy between biological and non Darwinian processes The results however have not yet become truly interdisciplinary The biological theory of evolution in form of the Extended Evolutionary Synthesis EES is only sparsely represented in theories published so far by scholars of religion Therefore this book reverses the line of view and asks how their results assort with evolutionary biology How can the subject area religion integrated into behavioral biology How is theory building affected by the asymmetry between the scarce empirical knowledge of prehistoric religion and the body of knowledge about extant and historic religions How does hominin evolution in general relate to the evolution of religion Are there evolutionary pre adaptations Subsequent versions of evolutionary biology from the original Darwinism to EES are used in interdisciplinary constructs Can they be integrated into a comprehensive theory The biological concept most often used is co evolution in form of a gene culture co evolution However the term denotes a process different from biological co evolution Important EES concepts do not appear in present models of religious evolution e g neutral evolution evolutionary drift evolutionary constraints etc How to include them into an interdisciplinary approach Does the cognitive science of religion CSR harmonize with behavioral biology and the brain sciences Religion as part of human culture is supported by a complex multi level behavioral system How can it be modeled scientifically The book addresses graduate students and researchers concerned about the scientific study of religion and biologist interested in interdisciplinary theory building in the field **Archaeological Concepts, Techniques, and**

Religion and Society in Middle Bronze Age Greece Helène Whittaker, 2014-05-12 The Middle Helladic period has received little attention partially because of scholars' view of it as merely the prelude to the Mycenaean period and partially because of the dearth of archaeological evidence from the period In this book Helène Whittaker demonstrates that Middle Helladic Greece is far more interesting than its material culture might at first suggest Whittaker comprehensively reviews and discusses the archaeological evidence for religion on the Greek mainland focusing on the relationship between religious expression and ideology The book argues that religious beliefs and rituals played a significant role in the social changes that were occurring at the time The arguments and conclusions of this book will be relevant beyond the Greek Bronze Age and will contribute to the general archaeological debate on prehistoric religion *Prehistoric Art as Prehistoric Culture* Primitiva Bueno-Ramírez, Paul Bahn, 2015-11-30 The diverse papers in this volume published in honour of Professor de Balbín cover a wide variety of the decorated caves which traditionally defined Palaeolithic art as well as the open air art of the period a subject in which he has done pioneering work at Siega Verde and elsewhere Theorizing Religions Past Harvey Whitehouse, Luther H. Martin, 2004-09-15 Historians bound by their singular stories and archaeologists bound by their material evidence don't typically seek out broad comparative theories of religion But recently Harvey Whitehouse's Omodes of religiosity theory has been attracting many scholars of past religions Based upon universal features of human cognition Whitehouse's theory can provide useful comparisons across cultures and historical periods even when limited cultural data is present In this groundbreaking volume scholars of cultures from prehistorical hunter gatherers to 19th century Scandinavian Lutherans evaluate Whitehouse's hypothesis that all religions tend toward either an imagistic or a doctrinal mode depending on how they are remembered and transmitted Theorizing Religions Past provides valuable insights for all historians of religion and especially for those interested in a new cognitive method for studying the past *Al-Din* M.A. Draz, 2023-01-26 Originally published in 1952 *al Din* by prominent Egyptian scholar Muhammad Abdullah Draz 1894-1958 has been critically acclaimed as one of the most influential Arab Muslim studies of universal religion and forms of

religiosity in modern times Written as an introductory textbook for a course in the History of Religions at King Fuad I University in Cairo the first of its kind offered at an Egyptian institution of higher learning this book presents a critical overview of classical approaches to the scholarly study of religion While ultimately adapted to an Islamic paradigm the book is a novel attempt to construct a grand narrative about the large methodological issues of Religious Studies and the History of Religions and in relation to modernity and secularism Translated for the first time in English by Yahya Haidar this book demonstrates how the scholarly academic study of religion in the West often described as Orientalist came to influence and help shape a counter discourse from one of the leading Arab Muslim scholars of his time Classical Approaches to the Study of Religion Jacques Waardenburg, 2017-01-23 Waardenburg s magisterial essay traces the rise and development of the academic study of religion from the mid nineteenth to the mid twentieth century outlining the establishment of the discipline its connections with other fields religion as a subject of research and perspectives on a phenomenological study of religion Futhermore a second part comprises an anthology of texts from 41 scholars whose work was programmatic in the evolution of the academic study of religion Each chapter presents a particular approach theory and method relevant to the study of religion The pieces selected for this volume were taken from the discipline of religious studies as well as from related fields such as anthropology sociology and psychology to name a few
