Methods Of Shapepreserving Spline Approximation:

Methods Of Shape-preserving Spline Approximation Boris I Kvasov, 2000-07-24 This book aims to develop algorithms of shape preserving spline approximation for curves surfaces with automatic choice of the tension parameters The resulting curves surfaces retain geometric properties of the initial data such as positivity monotonicity convexity linear and planar sections The main tools used are generalized tension splines and B splines A difference method for constructing tension splines is also developed which permits one to avoid the computation of hyperbolic functions and provides other computational advantages The algorithms of monotonizing parametrization described improve an adequate representation of the resulting shape preserving curves surfaces Detailed descriptions of algorithms are given with a strong emphasis on their computer implementation These algorithms can be applied to solve many problems in computer aided geometric design

Handbook of Splines Gheorghe Micula, Sanda Micula, 2012-12-06 The purpose of this book is to give a comprehensive introduction to the theory of spline functions together with some applications to various fields emphasizing the significance of the relationship between the general theory and its applications At the same time the goal of the book is also to provide new material on spline function theory as well as a fresh look at old results being written for people interested in research as well as for those who are interested in applications The theory of spline functions and their applications is a relatively recent field of applied mathematics In the last 50 years spline function theory has undergone a wonderful development with many new directions appearing during this time This book has its origins in the wish to adequately describe this development from the notion of spline introduced by I J Schoenberg 1901 1990 in 1946 to the

newest recent theories of spline wavelets or spline fractals Isolated facts about the functions now called splines can be found in the papers of L Euler A Lebesgue G Birkhoff J **Advanced Course on FAIRSHAPE** Panagiotis Kaklis,2012-12-06
