Methods For Studying Language Production:

Methods for Studying Language Production Lise Menn, Nan Bernstein Ratner, 1999-10-01 In this volume which simultaneously honors the career contributions of Jean Berko Gleason and provides an overview of a broad and increasingly important research area a panel of highly productive language researchers share and evaluate methods of eliciting and analyzing language production across the life span and in varying populations Chapters address a wide variety of historical and evolving approaches to data collection for the study of morphosyntax the lexicon and pragmatics both laboratory based and naturalistic Special concerns that arise in the study of atypical child development aging and second language acquisition are a focus of the discussion

Methods for Assessing Children's Syntax Dana McDaniel, Cecile McKee, Helen Smith Cairns, 1996 Designed in part as a handbook to assist in the choice and use of methods for investigating children's grammar this volume presents a selection of methods and pointers for designing and conducting experimental studies and for evaluating research

Contemporary Tools and Techniques for Studying Writing T. Olive, C.M. Levy, 2012-12-06 111 With some pride I hereby introduce the 10 volume in the Studies of Writing book series This volume aims to be a tool book for writing research In my opinion the editors and authors of this volume succeeded in this endeavor Four guiding questions are answered in all chapters on online techniques How to The key to such a book is providing insight in the decisions researchers make when developing tools and techniques such information is not found in journal articles and in the best case hidden in technical reports This book provides readers with detailed information about the ins and outs of various online techniques When to Another contribution of this tool book is to provide insight into when the tool can be used in other words to relate the tool or technique to the theoretical claims about the writing process or cognitive processes underlying writing processes Theory methodology tools and techniques handling data and interpretation form a coherent unit When not to There is no cow without a spot Dutch er is geen koe zonder vlekje is the literal translation of a Dutch expression Techniques tools have their limitations and their problems in applying them and or handling or interpreting the data they produce In a book like this researchers took the opportunity to provide readers with a look behind the curtains in the process of research Scientific critical reflection is one of the strong features of this book

Research Methods in Sign Language Studies Eleni Orfanidou, Bencie Woll, Gary Morgan, 2014-12-29

Research Methods in Sign Language Studies is a landmark work on sign language research which spans the fields of linguistics, experimental and developmental psychology, brain research, and language assessment. Examines a broad range of topics including ethical and political issues, key methodologies, and the collection of linguistic, cognitive, neuroscientific, and neuropsychological data. Provides tips and recommendations to improve research quality at all levels and encourages readers to approach the field from the perspective of diversity rather than disability. Incorporates research on sign languages from Europe, Asia, North and South America, and Africa. Brings together top researchers on the subject from around the world, including many who are themselves deaf.

Approaches to Language: Data, Theory, and Explanation Ángel J. Gallego, Aritz Irurtzun, 2020-12-24

The study of language has changed substantially in the last decades. In particular, the development of new technologies has allowed the emergence of new experimental techniques which complement more traditional approaches to data in linguistics, like informal reports of native speakers, judgments, surveys, corpus studies, or fieldwork. This move is an enriching feature of contemporary linguistics, allowing for a better understanding of a phenomenon as complex as natural language, where all sorts of factors, internal and external to the individual, interact. Chomsky (2005) has generated some sort of divergence, not only in research approaches but also in the phenomena studied, with an increasing specialization between subfields and accounts. At the same time, it has also led to subfield isolation and methodological *a priori* with some researchers even claiming that theoretical linguistics has little to offer to cognitive science (see, for instance, Edelman, Phillips, den Dikken, Bernstein, Tortora, Sprouse, Schtze, Phillips, 2013).

Research Methods in Second Language Acquisition Alison Mackey, Susan M. Gass, 2011-10-18

Research Methods in Second Language Acquisition With its cornucopia of information, both thorough and practical, this book is a must for our methodology shelves. Its study questions and project suggestions will be a boon for many research methods courses. Robert M. DeKeyser, University of Maryland. This guide to collecting, coding, and analyzing second language acquisition data will be an essential reference for novice and experienced researchers alike. Peter Robinson, Aoyama Gakuin University. Comprehensive and technically up to date, yet accessible and cogent. This remarkable textbook is sure to become a premier choice for the research training of many future SLA generations. Lourdes Ortega, University of Hawaii. Alison Mackey and Susan Gass's valuable new book offers hands-on methodological guidance from established experts on all kinds of second language research. Michael H. Long, University of Maryland. *Research Methods in Second Language Acquisition: A Practical Guide* is an informative guide to research design and methodology in this growing and vibrant field. Utilizing research methods and tools from varied fields of study, including education, linguistics, psychology, and sociology, this collection offers complete coverage of the techniques of second language acquisition research. This guide

covers a variety of topics such as second language writing and reading meta analyses research replication qualitative data collection and analysis and more Each chapter of this volume offers background step by step guidance and relevant studies to create comprehensive coverage of each method This carefully selected and edited volume will be a useful text for graduate students and scholars looking to keep pace with the latest research projects and methodologies in second language acquisition

Research Methods in Language Acquisition Barbara Lust, Maria Blume, 2016-11-07 Language acquisition research is challenging the intricate behavioral and cognitive foundations of speech are difficult to measure objectively The audible components of speech however are quantifiable and thus provide crucial data This practical guide synthesizes the authors decades of experience into a comprehensive set of tools that will allow students and early career researchers in the field to design and conduct rigorous studies that produce reliable and valid speech data and interpretations The authors thoroughly review specific techniques for obtaining qualitative and quantitative speech data including how to tailor the testing environments for optimal results They explore observational tasks for collecting natural speech and experimental tasks for eliciting specific types of speech Language comprehension tasks are also reviewed so researchers can study participants interpretations of speech and conceptualizations of grammar Most tasks are oriented towards children but special considerations for infants are also reviewed as well as multilingual children Chapters also provide strategies for transcribing and coding raw speech data into reliable data sets that can be scientifically analyzed Furthermore they investigate the intricacies of interpretation so that researchers can make empirically sound inferences from their data and avoid common pitfalls that can lead to unscientific conclusions

Appraising Research in Second Language Learning

Graeme Keith Porte, 2010 Designed for students of applied linguistics and second language acquisition on research training courses practising language teachers and those in training this combination textbook workbook is a set or recommended textbook on more than a hundred undergraduate and postgraduate courses worldwide Now in its second edition it remains the only book to provide specific advice and support to those wishing to learn a methodical approach to the critical analysis of a research paper It seeks to answer a current need in the literature for a set of procedures that can be applied to the independent reading of quantitative research Innovative features of the workbook include awareness raising reading tasks and guided exercises to help develop and practise the critical skills required to appraise papers independently Through informed and constructive appraisal of others work readers themselves are shown how to become more research literate to discover new areas for investigation and to organise and present their own work more effectively for publication and peer evaluation This revised second edition sees a closer integration of the text and workbook and a number of additions to the text itself as well as further guided and unguided research appraisal exercises
