Laughlin,2023 The goal of this accessible book is to articulate a coherent framework that unifies life history theory with comparative functional ecology to advance prediction in plant ecology Predicting how species respond to global change is perhaps the most important challenge of our time **Biodiversity and Insect Pests** Geoff M. Gurr,Stephen D. Wratten,William E. Snyder,2012-04-12 Biodiversity offers great potential for managing insect pests It provides resistance genes and anti insect compounds a huge range of predatory and parasitic natural enemies of pests and community ecology level effects operating at the local and landscape scales to check pest build up This book brings together world leaders in theoretical methodological and applied aspects to provide a comprehensive treatment of this fast moving field Chapter authors from Europe Asia Africa Australasia and the Americas ensure a truly international scope Topics range from scientific principles innovative research methods ecological economics and effective communication to farmers as well as case studies of successful use of biodiversity based pest management some of which extend over millions of hectares or are enshrined as government policy Written to be accessible to advanced undergraduates whilst also stimulating the seasoned researcher this work will help unlock the power of biodiversity to deliver sustainable insect pest management Visit www.wiley.com/go/gurr biodiversity to access the artwork from the book *Reproductive Allocation in Plants* Edward Reekie,Fakhri A. Bazzaz,2011-05-04 Much effort has been devoted to developing theories to explain the wide variation we observe in reproductive allocation among environments Reproductive Allocation in Plants describes why plants differ in the proportion

of their resources that they allocate to reproduction and looks into the various theories This book examines the ecological and evolutionary explanations for variation in plant reproductive allocation from the perspective of the underlying physiological mechanisms controlling reproduction and growth An international team of leading experts have prepared chapters summarizing the current state of the field and offering their views on the factors determining reproductive allocation in plants This will be a valuable resource for senior undergraduate students graduate students and researchers in ecology plant ecophysiology and population biology 8 outstanding chapters dedicated to the evolution and ecology of variation in plant reproductive allocation Written by an international team of leading experts in the field Provides enough background information to make it accessible to senior undergraduate students Includes over 60 figures and 29 tables

The Biology of Aquatic and Wetland Plants Gary N. Ervin, 2023-04-26 Aquatic plants play a critically important role in maintaining ecosystem health They are natural biological filters in freshwater and estuarine wetlands they contribute to the reproductive success of many organisms some of which are harvested for food they assist in flood control and they are prominent elements in the aesthetics and recreational use of freshwater and estuarine habitats Despite this globally recognized importance wetlands have faced and continue to face threats from the encroachment of human activities The Biology of Aquatic and Wetland Plants is a thorough and up to date textbook devoted to these plants and their interactions with the environment The focus is on botanical diversity from the perspective of evolutionary relationships emphasizing the role of evolution in shaping adaptations to the aquatic environment By incorporating recent findings on the phylogeny of green plants with special emphasis on the angiosperms the text is broadly useful for courses in plant biology physiology and ecology Additionally a chapter on population biology and evolutionary ecology complements the evolutionary backdrop of hydrophyte biology by examining the details of speciation and applications of modern genetic approaches to aquatic plant conservation Key Features Synthesizes recent and seminal literature on aquatic and wetland plants Emphasizes evolutionary history as a factor influencing adaptations to the wetland environment Provides a global perspective on plant diversity and threats facing wetland ecosystems Highlights research needs in the field of aquatic and wetland plant biology Includes 280 figures with more than 300 color photographs and 41 tables to provide ease of access to important concepts and information

Early Hominin Paleoecology Matt Sponheimer, Julia A. Lee-Thorp, Kaye E. Reed, Peter Ungar, 2013-05-15 An introduction to the multidisciplinary field of hominin paleoecology for advanced undergraduate students and beginning graduate students Early Hominin Paleoecology offers an up to date review of the relevant literature exploring new research and synthesizing old and new ideas Recent advances in the field and the laboratory are not only improving our understanding of human evolution but are also transforming it Given the increasing specialization of the individual fields of study in hominin paleontology communicating research results and data is difficult especially to a broad audience of graduate students advanced undergraduates and the interested public Early Hominin Paleoecology provides a good working knowledge of the

subject while also presenting a solid grounding in the sundry ways this knowledge has been constructed The book is divided into three sections climate and environment with a particular focus on the latter adaptation and behavior and modern analogs and models and features contributors from various fields of study including archaeology primatology paleoclimatology sedimentology and geochemistry Early Hominin Paleoecology is an accessible introduction into this fascinating and ever evolving field and will be essential to any student interested in pursuing research in human paleoecology Additional Contributors David Braun Beth Christensen David J Daegling Crag Feibel Fred E Grine Clifford Jolly Naomi E Levin Mark A Maslin John Mitani Jay Quade Amy L Rector Jeanne Sept Lillian M Spencer Mark Teaforde Carol V Ward Katy E Wilson
