Ruble, 2001-05-28 By exploring and comparing North America s Russia s and Japan s second cities Chicago Moscow and Osaka Second Metropolis discloses the extent to which social fragmentation frequently viewed as an obstacle to democratic development actually fostered a pragmatic pluralism that nurtured pluralistic public policies Such policies are explored through six case studies the politics of street railways and charter reform in Chicago adult education and housing in Moscow and harbor revitalization and poverty alleviation in Osaka that illustrate how even those with massive political and economic power were stymied by the complexity of their communities Chicago Moscow and Osaka though the products of very different nations and cultures nonetheless shared an important experience of inclusive politics during an era of extraordinary growth and social diversity The success of all three cities which went well beyond mere survival rested on a distinctive political resource pragmatic pluralism Mega Urban Regions of Southeast Asia Ira M. Robinson, 2011-11-01 A distinguishing feature of recent urbanization in the ASEAN countries of Thailand Malaysia the Philippines Singapore and Indonesia is the outward extension of their mega cities Bangkok Jakarta Manila Singapore and Kuala Lumpur beyond the metropolitan borders resulting in the establishment of new towns industrial estates and housing projects in previously rural areas This process has both positive and negative effects On one side household incomes and employment opportunities are increasing but on the other the growth often causes serious problems in terms of

environmental deterioration conflicting land uses and inadequate housing and service provisions Mega Urban Regions of Southeast Asia is the first comprehensive work on the subject of ASEAN mega urban regions The contributors review T G McGee s original idea of desakota zones and offer arguments both for and against this concept making a significant contribution to our understanding of the true face of ASEAN cities The book brings together authors from around the world and will be of interest to a wide audience including demographers urban planners geographers sociologists economists civil servants and development consultants

**The Urban Land Nexus and the State** A. J. Scott, 2013-02-01 This book was first published in 1980 In this book the author has tried to establish the main guidelines of a determinate analysis of the phenomena of urbanization and planning in two principal stages Firstly the attempt to identify something of the broad social structure and logic within which these phenomena are embedded and from which they ultimately draw their character Second to attempt to discover in detail the ways in which these phenomena appear within society assume a specific internal order and change through time

**Rethinking the Great Transition** Peter L. Larson, 2022 This case study of two rural parishes in County Durham England provides an alternate view on the economic development involved in the transition from medieval to modern partly explaining England s rise to global economic dominance in the seventeenth century Coal mining did not come to these parishes until the nineteenth century these are an example of agrarian expansion Low population favourable seigniorial administration and a commercialised society saw the emergence of large farms on the bishopric of Durham soon after the Black Death these secure copyhold and leasehold tenures were among the earliest known in England Individualism developed within a strong parish and village community that encouraged growth while enforcing conformity tenants had freedom to farm as they wished within limits Along with low rents this allowed for a swift expansion of agricultural production in the sixteenth century as population rose and then as the coal trade expanded rapidly The prosperity of these men is reflected in their lands livestock and consumer goods Yet not all shared in this prosperity as the poor and landless increased in number simply by population growth Through reformation and rebellion these and other parishes prospered without experiencing severe disruption or destruction In north eastern England agrarian development was an evolution and not a revolution This study shows England s economic development as a single narrative woven together from a collection of regional experiences at different times and at different speeds

Metropolitan Networks , Photoinduced Phase Transitions K. Nasu,2004 A new class of insulating solids was recently discovered When irradiated by a few visible photons these solids give rise to a macroscopic excited domain that has new structural and electronic orders quite different from the starting ground state This occurrence is called photoinduced phase transition and this multi authored book reviews recent theoretical and experimental studies of this new phenomenon **The Routledge Handbook of Regional Design** Michael Neuman, Wil Zonneveld, 2021-04-14 The Routledge Handbook of Regional Design explores contemporary research policy and practice that highlight critical aspects of strategy making planning and designing for contemporary regions including city regions bioregions delta regions and their hybrids As accelerating urbanization and globalization combine with other forces such as the demand for increasing returns on investment capital migration and innovation they yield cities that are expanding over ever larger territories Moreover these polycentric city regions themselves are agglomerating with one another to create new territorial mega regions The processes that beget these novel regional forms produce numerous and significant effects positive and negative that call for new modes of design and management so that the urban places and the lives and well being of their inhabitants and businesses thrive sustainably into the future With international case studies from leading scholars and practitioners this book is an important resource not just for students researchers and practitioners of urban planning but also policy makers developers architects engineers and anyone interested in the broader issues of urbanism *Regional Decision Making: New Strategies for Substate Districts* United States. Advisory Commission on Intergovernmental Relations, 1973 *American Sociological Review* , 1936 Includes sections Book reviews and Periodical literature Spatial Planning in Ghana Ransford A. Acheampong, 2018-10-24 This book documents and analyses spatial planning in Ghana providing a comprehensive and critical discussion of the evolving institutional and legal arrangements that have shaped and defined Ghana's spatial planning system for more than seven decades the contemporary policy instruments and mechanisms for articulating and implementing policies and proposals at multiple scales and the formally established procedures for development management It covers important themes in contemporary spatial planning discourse including the evolving meaning scope and purpose of spatial planning globally the scales of spatial planning i.e. national regional sub regional and local multi level integration within spatial planning public participation the interface between urbanization sustainable growth management and spatial planning spatial planning and housing development integrated spatial development and transportation planning and spatial planning and the urban informal economy Intended for undergraduate and graduate students and academic researchers and practitioners policy makers in the multidisciplinary field of spatial planning it appeals to readers seeking an international perspective on spatial planning systems and practices **Feynman-Kac Formulae** Pierre Del Moral, 2012-12-06 The central theme of this book concerns Feynman-Kac path distributions interacting particle systems and genealogical tree based models This recent theory has been stimulated from different directions including biology physics probability and statistics as well

as from many branches in engineering science such as signal processing telecommunications and network analysis Over the last decade this subject has matured in ways that make it more complete and beautiful to learn and to use The objective of this book is to provide a detailed and self contained discussion on these connections and the different aspects of this subject Although particle methods and Feynman Kac models owe their origins to physics and statistical mechanics particularly to the kinetic theory of fluid and gases this book can be read without any specific knowledge in these fields I have tried to make this book accessible for senior undergraduate students having some familiarity with the theory of stochastic processes to advanced postgraduate students as well as researchers and engineers in mathematics statistics physics biology and engineering I have also tried to give an expose of the modern mathematical theory that is useful for the analysis of the asymptotic behavior of Feynman Kac and particle models

*Policing European Metropolises* Elke Devroe, Adam Edwards, Paul Ponsaers, 2017-02-03 Understanding the politics of security in city regions is increasingly important for the study of contemporary policing This book argues that national and international governing arrangements are being outflanked by various transnational threats including the cross border terrorism of the attacks on Paris in 2015 and Brussels in 2016 trafficking in people narcotics and armaments cybercrime the deregulation of global financial services and environmental crime Metropolises are the focal points of the transnational networks through which policing problems are exported and imported across national borders as they provide much of the demand for illicit markets and are the principal engines generating other policing challenges including political protest and civil unrest This edited collection examines whether and how governing arrangements rooted in older systems of national sovereignty are adapting to these transnational challenges and considers problems of and for policing in city regions in the European Union and its single market Bringing together experts from across the continent *Policing European Metropolises* develops a sociology of urban policing in Europe and a unique methodology for comparing the experiences of different metropolises in the same country This book will be of value to police researchers in Europe and abroad as well as postgraduate students with an interest in policing and urban policy
