Elias, 1967 *Metropolis* C.E. Elias (Jr.), James Gillies, Svend Riemer, 1964 **Public Health Service Publication**, 1969 The City Joel Kotkin, 2007-12-18 If humankind can be said to have a single greatest creation it would be those places that represent the most eloquent expression of our species' ingenuity, beliefs and ideals: the city. In this authoritative and engagingly written account, the acclaimed urbanist and bestselling author examines the evolution of urban life over the millennia and in doing so attempts to answer the age-old question: What makes a city great? Despite their infinite variety, all cities essentially serve three purposes: spiritual, political and economic. Kotkin follows the progression of the city from the early religious centers of Mesopotamia, the Indus Valley and China to the imperial centers of the Classical era, through the rise of the Islamic city and the European commercial capitals, ending with today's post-industrial suburban metropolis. Despite widespread optimistic claims that cities are back in style, Kotkin warns that whatever their form, cities can thrive only if they remain sacred, safe and busy, and this is true for both the increasingly urbanized developing world and the often self-possessed global cities of the West and East Asia. Looking at cities in the twenty-first century, Kotkin discusses the effects of developments such as shifting demographics and emerging technologies. He also considers the effects of terrorism, how the religious and cultural struggles of the present pose the greatest challenge to the urban future. Truly global in scope, *The City* is a timely narrative that will place Kotkin in the company of Lewis Mumford, Jane Jacobs and other preeminent urban scholars. **Urban Outlook** United States. Department of Housing and Urban Development, 1969 **Geography and Politics in Israel Since 1967** Elisha Efrat, 2005-08-16 First Published in 1988 Routledge is an imprint of Taylor Francis, an informal company. **Land Planning and the Law**, 1965 *Centrality and Cities* James Bird, 2013-04-15 Professor Bird presents a synthesis of the many approaches to the study of a central feature of modern life: the city, including its distant past and its future. He sees centrality as a mental projection on to space and discusses the concept in relation to three types of its manifestation in spatial terms: the city as centre of a tributary region, the centres and central areas of cities themselves, and the city considered as a centre or gateway for other distant regions, often overseas. This book should do much to unravel the fundamental similarities between cities of the world while recognizing the myriad variations upon a common theme. This book was first published in 1977. Bibliography on the Urban Crisis Jon K. Meyer, 1969 The City Alan S. Berger, 1978 *Urban Sociology and Urbanized Society* J.R. Mellor, 2013-04-15 Focusing on urban sociology as practised in Britain, the author argues that it is a key element in the response of the intellectual proletariat to urbanization and the calls on it by the State to control the ensuing way of life. The themes of urban sociology have been the concerns of the Welfare State and despite radical inputs, the

discipline has remained tied up with the assumptions and methodological precepts of liberalism The author s contention is that urbanization should be analysed in the framework of the political economy of regional development This book was first published in 1977 **Films, Filmstrips, Slides, and Audio Tapes on Housing and Community Development** United States.
