Foster, 1997-03-01 In recent decades local governments across America have increasingly turned specialized functions over to autonomous agencies ranging in scope from subdivision sized water districts to multi state transit authorities This book is the first comprehensive examination of the causes and consequences of special purpose governments in more than 300 metropolitan areas in the United States It presents new evidence on the economic political and social implications of relying on these special districts while offering important findings about their use and significance

Elinor Ostrom and the Bloomington School of Political Economy Daniel H. Cole, Michael D. McGinnis, 2014-12-24 Elinor Lin Ostrom was awarded the 2009 Nobel Memorial Prize in Economic Sciences for her pathbreaking research on economic governance especially the commons but she also made important contributions to several other fields of political economy and public policy The range of topics she covered and the multiple methods she used might convey the mistaken impression that her body of work is disjointed and incoherent This four volume compendium of papers written by Lin alone or with various coauthors most notably including her husband and partner Vincent supplemented by others expanding on their work brings together the common strands of research that serve to tie her impressive oeuvre together That oeuvre together with Vincent's own impressive body of work has come to define a distinctive school of political economic thought the Bloomington School Each of the four volumes is organized around a central theme of Lin's work Volume 1 explores the roles played by the concept polycentricity in the disciplines of public administration political science and other forms of political economy Polycentricity denotes a complex system of governance in which public authorities citizens and private organizations work together to establish and enforce the rules that guide their behavior It encapsulates an approach toward policy analysis that blurs standard disciplinary boundaries between the social sciences Throughout their long and remarkably productive careers Elinor and Vincent Ostrom never tired of reminding us of the capacity of ordinary humans to transcend their own limitations by engaging with others in the myriad forms of collective action required to build and sustain a self governing society Their careers stand as exemplars of the proper relationship between rigorous scholarship and responsible citizenship

Governing Metropolitan Areas David K. Hamilton, 2014-04-24 Interest and research on regionalism has soared in the last decade Local governments in metropolitan areas and civic organizations are increasingly engaged in cooperative and collaborative public policy efforts to solve problems that stretch across urban centers and their surrounding suburbs Yet there remains scant attention in textbooks to the issues that arise in trying to address metropolitan governance **Governing Metropolitan Areas** describes and analyzes structure to understand the how and why of regionalism in our global age The book covers governmental institutions and their evolution to governance but with a continual focus on institutions David Hamilton provides the necessary comprehensive in depth description and analysis of how metropolitan areas and governments within metropolitan areas developed efforts to restructure and combine local governments and governance within the polycentric urban region This second edition is a major revision to update the scholarship and current thinking on regional governance While the text still provides background on the historical development and growth of urban areas and governments efforts to accommodate the growth of metropolitan areas this edition also focuses on current efforts to provide governance through cooperative and collaborative solutions There is also now extended treatment of how regional governance outside the United States has evolved and how other countries are approaching regional governance

Racial Politics And Urban Planning Robert A. Catlin, 2014-10-17 When Richard G Hatcher became the first black mayor of Gary Indiana in 1967 the response of Gary s white businessmen was to move the entire downtown to the suburbs thereby weakening the city core Meanwhile white business and institutional leaders in Atlanta Detroit and Newark worked with black mayors heading those majority black cities to rebuild their downtowns and neighborhoods Why not Gary Robert A Catlin who served as Mayor Hatcher s planning advisor from 1982 to 1987 here analyzes the racial conflicts that tore Gary apart He asserts that two types of majority black cities exist Type I including Atlanta Baltimore Detroit and Newark have Fortune 500 corporate headquarters major universities and large medical centers institutions that are placebound and their leaders must work with black mayors Type II cities like Gary lack these resources thus their white leaders feel less compelled to cooperate with black mayors Unfortunately in Gary s case black politicians and white executives fell victim to pettiness and mistrust and as a result Gary and the entire northwest Indiana region suffered **Racial Politics and Urban Planning** is required reading for citizens interested in urban affairs Leaders in cities such as Albany and Macon Georgia Monroe Louisiana Mount Vernon New York and Pine Bluff Arkansas should also take note Those cities have just become majority black and are in the Type II category Will they learn from Gary or are they doomed to repeat its mistakes

Leadership: Political-economic, Regional Business And Socio-community Contexts Tai Wei Lim, 2020-03-20 Political leadership styles in East Asian states are shaped and influenced by a number of domestic factors These factors include the type of political system that an East Asian state adopted from their days of independence and decolonization There is a diverse array of political systems in the region ranging from Western style liberal democracies like Japan and South Korea to autocratic one party states like North Korea Most other East Asian countries adopt systems somewhere in between these two polar ends This volume begins with a macro political perspective of leadership It then looks at case studies of political leadership and the factors that influence the shape and outcome of leadership styles in the region The book also examines the concept of community leadership and its impact on

community well being Several specific case studies are examined in depth While examining political leadership from a macro theoretical and empirical perspective the book also adopts historical anthropological perspectives to analyse case studies The case studies also examine policy formulation and implementation to look at the role of government in handling community level issues Finally the book focuses on economic leadership in international political economy and global business

Metropolitan Problems S. Miles, 2013-05-13 Metropolitan Problems is the end product of one of the most dynamic research programmes of its kind ever conceived and executed The book which took three years to complete represents the culmination of a two year study that was highlighted by a conference held in Toronto in 1967 In the early 1960s the Bureau of Municipal Research in Metropolitan Toronto decided that a significant way for it to celebrate Canada's centennial would be to initiate a systematic international study of the world's metropolitan areas The study with the official cooperation of the United Nations was designed to produce positive insights into the methods of coping with the interlocking sets of problems associated with the expansion of the modern metropolis Twelve papers on various aspects of metropolitan problems were commissioned from an international body of experts Working with these experts were study groups drawn from forty major metropolitan centres throughout the world After making exhaustive studies of their respective urban centres the groups reported their findings and submitted detailed briefs through their representatives at the conference Throughout the symposium a conscious effort was made to examine single aspects of social economic and physical change within the overall perspective of the metropolis The book reflects this approach Each chapter directs attention to specific problems of the metropolis problems resulting from the contradiction between accelerating technology and our ability to cope with the incredible pace and rate of change Together they prove that despite differences in technology culture and political and social matters the major urban areas of the world do have much in common Emerging tendencies can be analysed and corrective and preventative measures be made through comparative analysis This book was first published in 1970

Imperfect Union Christopher R. Berry, 2009-09-14 Special purpose jurisdictions such as school districts water districts and transit authorities constitute the most common form of local government in the United States today This book offers the first political theory of special purpose jurisdictions and provides extensive empirical analyses of the politics and finances of these often overlooked but increasingly influential governments

Civic Virtues Richard Dagger, 1997-06-19 Although few want to deny their importance many political theorists have recently complained that too much weight is now attached to individual rights The result as they see it is an excessive individualism that blinds people to the needs of the community or state to which they belong We should be less

concerned with our rights in their view and more concerned with our responsibilities Those who advance this view typically argue against liberalism In Civic Virtues the newest addition to the distinguished Oxford Political Theory series Richard Dagger takes a different approach Finding the proper relationship between rights and responsibilities requires us not to choose between liberalism and republicanism he argues but to unite them in a republican form of liberalism Is such a marriage of republicanism and liberalism possible Is it desirable Dagger demonstrates how republican liberalism proceeds from a fundamental right of autonomy to the recognition of interdependence and reciprocity and on to the cultivation of the civic virtues of the public spirited citizen Indeed republican liberalism promises not only to reconcile individual rights and civic duties but to enhance political deliberation and the sense of community as well **Keep Out** Sidney
