The Art of Medieval Jewelry T.N. Pollio, 2021-09-28

What are the origins of the imagery and designs on common jewelry and portable artwork between late antiquity and the Middle Ages? These dynamic centuries encompass the transformation of the Greco-Roman world into the nascent kingdoms and medieval states upon which most modern European nations are based. The choices of jewelry and other forms of personal expression among the lower classes in ancient times is notoriously difficult to contextualize for a number of reasons. Nonetheless, these precious articles were expressions of individual identity as well as signifiers of rites of passage. As such, they reflect not only the people who wore them but also the social milieu and artistic trends at that moment in time. This new study assists in identifying the types, origins, and routes of transmission of personal artwork, particularly finger rings across Europe and Byzantium, an area of study that has been neglected in previous works. Some of this material represents the first time relevant research from Central and Eastern Europe has been translated and made available to the general reader in the English-speaking world.

American Watercolor in the Age of Homer and Sargent Kathleen A. Foster, Philadelphia Museum of Art, 2017-01-01

The fascinating story of the transformation of American watercolor practice between 1866 and 1925. The formation of the American Watercolor Society in 1866 by a small, dedicated group of painters transformed the perception of what had long been considered a marginal medium. Artists of all ages, styles, and backgrounds took up watercolor in the 1870s, inspiring younger generations of impressionists and modernists. By the 1920s, many would claim it as the American medium. This engaging and comprehensive book tells the definitive story of the metamorphosis of American watercolor practice between 1866 and 1925, identifying the artist constituencies and social forces that drove the new popularity of the medium. The major artists of the movement—Winslow Homer, John Singer Sargent, William Trost Richards, Thomas Moran, Thomas Eakins, Charles Prendergast, Childe Hassam, Edward Hopper, Charles Demuth, and many others—are represented with lavish color illustrations. The result is a fresh and beautiful look at watercolor's central place in American art and culture.

Culinary Technology of the Ancient Near East Jill L. Baker, 2024-10-28. Culinary Technology of the Ancient Near East discusses the technical aspects of meal preparation, cooking, and baking in the ancient Near East, exploring a wide range of topics including kitchens, cooking equipment, cooking and baking vessels, and serving and eating utensils. Chapters explore and describe the culinary technologies and techniques employed by the peoples of the ancient Near East from the Neolithic to the Early Roman period, considering their unique and pioneering contributions to the development and evolution of gastronomic devices and apparatus, and highlighting some of the foods prepared by them, recognizing their application and influence in contemporary cooking and baking. Baker brings together in a single volume what is known about the culinary technology of the ancient Near East based on the archaeological, textual, historic, and scientific data drawn from a wide range of studies and discusses this data in terms of its cultural, historic, and socio-economic context. She emphasizes these technologies as the foundation upon which modern culinary technology is based and applies relevant ancient techniques to modern systems. Overall, the volume acknowledges the ingenuity of the ancient mind in order to understand their culinary technology, which in turn helps us better understand our own and apply these and new ideas to the present and future. This is a fascinating study suitable for students and scholars working on food and households in the ancient Near East as well as those working on the history of food, cooking, and dining, and the history of technology more broadly.

Capital Problem Arthur S. Marks, 2013-01-01. Explores the history, application, and accrued meanings of the Attic order in America, beginning with Benjamin Henry Latrobe, who employed the order. The author traces the genealogy of the architectural influence as it passes from Latrobe to his disciples to their disciples. Latrobe saw a singular exception, a unique design feature that, besides having a direct and indisputable association with ancient Greece, also offered Americans an architectural order that might be naturalized that might be made their own. The work is extremely fine-grained and rich in references, especially to 18th and 19th-century architectural literature. 45 b/w plates.

Archaeology of Empire in Achaemenid Egypt Henry P. Colburn, 2019-09-11. A study of the material culture of Egypt during the period of Achaemenid/Persian rule c. 526-404 BCE. Provides a clear overview of the archaeological evidence for Achaemenid Egypt, including temples, tombs, irrigation works, statues, stelae, seals, and coins. Demonstrates how different types of evidence, both textual and archaeological, including material of uncertain provenance, can be used to address a single historical question. Offers critical discussion of the dating criteria used by archaeologists for Egyptian Late Period material. Elucidates strategies used by the Persians to establish and maintain control of Egypt. Examines how these strategies may have affected the lives of people living in Egypt during the 27th

Dynasty Creates a new explanatory model for the introduction of coinage to ancient Egypt Previous studies have characterised Achaemenid rule of Egypt either as ephemeral and weak or oppressive and harsh These characterisations however are based on the perceived lack of evidence for this period filtered through ancient and modern preconceptions about the Persians Henry Colburn challenges these views by assembling and analyzing the archaeological remains from this period including temples tombs irrigation works statues stelae sealings drinking vessels and coins By looking at the decisions made about material culture by Egyptians Persians and others it becomes possible to see both how the Persians integrated Egypt into their empire and the full range of experiences people had as a result **Museum News** Laurence Vail Coleman, Mary Bronson Hartt, 1924

Weak Painting After Modernism Craig Staff, 2023-09-01 This book examines the terms upon which painting in the United States sought to negotiate with the legacy of American formalist aesthetics and by extension the understanding of modernist painting it had become most readily associated with In so doing a separate set of possibilities for painting gradually began to emerge The salient debates and practices that collectively worked to establish such a response are approached through the philosopher Gianni Vattimo's idea of *pensiero debole* or so called weak thought To this end the proposed study both identifies and seeks to examine a type of weak painting which like Vattimo's idea took as its critical point of departure the exhaustion but not the vanishing of the project of modernism the belief in reason progress history the nation state etc Craig Staff explores particular instances wherein artists sought to extend the parameters of the object beyond what had been called into question namely the proclivity for modernist painting's strength to be understood as denoting amongst other things a perceived set of universal essences This book will be of interest to scholars working in art history fine art cultural studies critical theory curatorial studies and philosophy *Famous Battles and How They Shaped the Modern World* Beatrice Heuser, Athena S. Leoussi, 2018-08-30

Why are some battles remembered more than others Surprisingly it is not just size that matters nor the number of dead the decisiveness of battles or their effects on communities and civilisations It is their political afterlife the multiple meanings and political uses attributed to them that determines their fame This ground breaking series goes well beyond military history by exploring the transformation of battles into sites of memory and meaning Cast into epic myths of the fight of Good against Evil of punishment for decadence or reward for virtue of the birth of a nation or the collective assertion against a tyrant the defence of Civilisation against the Barbarians Christendom against the Infidel particular battles have acquired fame beyond their immediate contemporaneous relevance The epic battles of European history examined in this first volume range from the siege of Troy and the encounters of Marathon and Thermopylai to the wars of the Israelites which inspired the way many later battles would be narrated and from the triumphs and defeats of the Roman Empire to Hastings the massacre of Bziers and the battle of Courtrai In each chapter the historical events surrounding a battle form the backdrop for multi layer interpretations which consciously or unconsciously carry political agendas *Approaching Eden* Theresa Sanders, 2009-11-16 You don't have to be religious for

the story of Adam and Eve to have touched your life From Voldemort's snake mascot in Harry Potter novels to the forbidden fruit apple that puts Snow White to sleep in fairy tales we are inundated with references to the Garden of Eden in popular culture from an early age On a deeper level the story has been used as justification for conflicting viewpoints on issues ranging from nudity to marriage to slavery Approaching Eden digs much deeper than merely cataloguing entertaining Adam and Eve references in popular culture by exploring how these references are used and how they shape society Theresa Sanders provides essential historical background from Christian Jewish and Muslim perspectives to show the relevance and prominence of Adam and Eve's story in life today *The Jackson Pollock Sketchbooks in the Metropolitan Museum of Art*
