Metropolitan Frontier And American Politics:

The Metropolitan Frontier and American Politics, 2003-02-01 American civilization has been shaped by four decisive forces the frontier migration sectionalism and federalism The frontier has offered abundance to those who would could take advantage of its opportunities stimulated technological innovation and been the source of continuous change in social structure and economic organization migration has been responsible for relocating cultures from the Old world to the New various sections of geographic territories have adjusted to the overall American culture without losing their individual distinctiveness and federalism has shaped the United States political and social organization The Metropolitan Frontier and American Politics was begun in the late 1950s under the auspices of the University of Illinois Institute of Government and Public Affairs as a study of the eight lesser metropolitan areas in Illinois What started out as a design for community maps of each area with the intent to outline their particular political systems led to a major study of metropolitan cities of the prairie the heartland area between the Great Lakes and the Continental Divide with an examination of the processes that have shaped American politics The distinctive features of geographic areas that Elazar discovered can be understood as reflections of the differences in cultural backgrounds of their respective settlers Understanding these communities requires an examination of their place in the federal system the impact of frontier and section upon them and a study of the cultures that inform them as civil communities The volume is consequently divided into three parts Cities Frontiers and Sections Streams of Migration and Political Culture and Cities States and Nation each of which explores Elazar's concerns in discovering the interrelationship between the cities of the frontier and American politics A prequel to *The Closing of the American Mind* published by Transaction in 2002 *The Metropolitan Frontier and American Politics* will be of great interest to students of politics American history and ethnography

The Metropolitan Frontier and American Politics Daniel J. Elazar, 1970 American civilization has been shaped by four decisive forces the frontier migration sectionalism and federalism The frontier has offered abundance to those who would could take advantage of its opportunities stimulated technological innovation and been the source of continuous change in social structure and economic organization migration has been responsible for relocating cultures from the Old world to the New various sections of geographic territories have adjusted to the overall American culture without losing their individual distinctiveness and federalism has shaped the United States political and social organization The Metropolitan Frontier and American Politics was begun in the late 1950s under the auspices of the University of Illinois Institute of Government and Public Affairs as a study of the eight lesser metropolitan areas in Illinois What started out as a design for community maps of each area with the intent to outline their particular political systems led to a major study of metropolitan cities of the prairie the heartland area between the Great Lakes and the Continental Divide with an examination of the processes that have shaped American politics The distinctive features of geographic areas that Elazar discovered can be understood as reflections of the differences in cultural backgrounds of their

respective settlers Understanding these communities requires an examination of their place in the federal system the impact of frontier and section upon them and a study of the cultures that inform them as civil communities The volume is consequently divided into three parts Cities Frontiers and Sections Streams of Migration and Political Culture and Cities States and Nation each of which explores Elazar's concerns in discovering the interrelationship between the cities of the frontier and American politics A prequel to *The Closing of the Metropolitan Frontier* published by Transaction in 2002 *The Metropolitan Frontier and American Politics* will be of great interest to students of politics American history and ethnography

Ellis, 1993-07-29 This work challenges the thesis first formulated by de Tocqueville and later systematically developed by Louis Hartz that American political culture is characterized by a consensus on liberal capitalist values Ranging over three hundred years of history and drawing upon the seminal work anthropologist Mary Douglas Richard Ellis demonstrates that

American history is best understood as a contest between five rival political cultures egalitarian community competitive individualism hierarchical collectivism atomized fatalism and autonomous hermitude

The Metropolitan Frontier Carl Abbott, 1993-11-01 When the American West represented the country s frontier many of its cities may have seemed little more than trading centers to serve the outlying populace Now the nation s most open and empty region is also its most heavily urbanized with eighty percent of Westerners living in its metropolitan areas The process of urbanization that had already transformed the United States from a rural to an urban society between 1815 and 1930 has continued most clearly and completely in the modern West where growth since 1940 spurred by mobilization for World War II has constituted a distinct era in which Western cities have become national and even international pacesetters The Metropolitan Frontier places this last half century of Western history in its urban context making it the first comprehensive overview of urban growth in the region Integrating the urban experience of all nineteen Western states Carl Abbott ranges for evidence from Honolulu to Houston and from Fargo to Fairbanks to show how Western cities organize the region s vast spaces and connect them to the even larger sphere of the world economy His survey moves

from economic change to social and political response examining the initial boom of the 1940s the process of change in the following decades and the ultimate impact of Western cities on their environments on the Western regional character and on national identity Today a steadily decreasing number of Western workers are engaged in rural industries but Western cities continue to grow As ecological and social crises begin to affect those cities Abbott s study will prove required reading for historians geographers sociologists urban planners and all citizens concerned with America s future **The Dynamics Of**

Frontiers Daniel Judah Elazar, The Opening of the Cybernetic Frontier is the third installment in the Cities of the Prairie project It completes an ongoing multi generational comparative study of ten medium sized communities located in five Prairie and Plains states Illinois Iowa Minnesota Wisconsin and Colorado This long term study was initiated by Daniel J Elazar in 1959 to develop a comprehensive theory explaining and forecasting the development of the civil community based upon the changing relationship between internal developments and external factors In this new volume Elazar and his

colleagues trace developments in these communities during the 1980s and 1990s. The study examines how local communities function politically, socially, and economically and then analyzes the impact that regional, national, and international trends and patterns have on local political systems in general and the cities of the prairie in particular. It revisits these communities at the dawning of a new frontier, the city cybernetic frontier, which is characterized by a knowledge-intensive economic base made possible by computer and communication technologies. Changing technology has accelerated the settlement patterns that emerged after World War II. Ongoing population sprawl means that individuals are leaving the suburbs to live in the exurbs and beyond, creating a citybelt phenomenon that relies upon new technologies. Metropolitan Organization, 1992

Political Change in the Metropolis Ronald Vogel, John Harrigan, 2015-10-05. This popular text has been thoroughly updated and revised to sharpen the focus on its bias and change theme. It includes the latest data studies informing the field and covers important new topics, e.g., flood disaster in New Orleans. *Political Change in the Metropolis*, Eighth Edition, continues to focus on the political changes that have taken place in American cities and the reactions of urban scholars to them. In addition to offering scholarly perspectives, the text offers students a theoretical framework for interpreting these changing events for themselves. This framework analyzes the patterns of bias inherent in the organization and operation of urban politics, giving students an in-depth look at the fascinating and constantly changing face of urban politics. Features: Accessible writing style engages students in the material. Provides excellent coverage of the impact of immigrants and ethnic groups in the making of the American city. An abundance of historical material helps students better understand the origins and development of urban politics and structures. Case studies throughout the text give students an opportunity to apply important material. The text exposes students to first-rate discussions of political phenomena and empirical literature on those phenomena.

The Closing of the Metropolitan Frontier Daniel Judah Elazar, 1986. The period from the mid 1960s to the early 1980s signaled the end of the prosperity of the postwar years enjoyed by the cities of the prairie: those cities located immediately within or adjacent to the Mississippi River drainage system or what is usually called the American Heartland. During this period, the bottom dropped out of local economies and all collapsed except those upheld by massive state institutions. With this collapse, optimism for new opportunities ended, signaling the close of the American frontier. *The Closing of the Metropolitan Frontier* looks at mid-sized cities: Champaign, Urbana, Decatur, Joliet, Moline, Peoria, Rockford, Rock Island, and Springfield, Illinois; Davenport, Iowa; Duluth, Minnesota; and Pueblo, Colorado. Elazar examines how they adapted to change during the period immediately after World War II through the Vietnam War and the Nixon years. He considers the roles of federal and state governments as instruments of change, including their efforts to impose new standards and ways of doing business. *The Closing of the Metropolitan Frontier* analyzes the struggle between federalism and managerialism in the local political arena. In his new introduction, Daniel J. Elazar discusses this volume's place as part of a forty-year study of the cities of the prairie as well as the changes and developments in that region over that forty-year span. This volume will be of

Resetting the Political Culture Agenda: From Polis to International Organization Antonia Zervaki, 2014-07-08 The analysis of the formation processes and manifestations of political culture in the domain of international relations and organization lacks a concrete theoretical and methodological framework However the main theoretical and methodological deficits seem to be related to the need for a clear cut definition of the concept itself as well as to the integration of political science methodological tools into the international institutional law debate This book considers the basic theoretical and methodological requirements for the use of political culture as a conceptual tool in the field of international organization research Moreover it applies the core theoretical and methodological assumptions to three case studies namely the United Nations the Council of Europe and the European Union which are perceived as agents of distinct political cultures in the international system
