The Museum Owen Hopkins,2021-10-12 This beautiful and visually immersive book charts the fascinating story of the institution of the Museum from its origins to the present Visited by millions around the world every year museums are one of

mankind's most essential creations. They tell stories, shape cultural identities and hold valuable insight about the past and about the future. This captivating work charts a path from the very first collection through to the latest developments in cultural curation, interweaving. Using examples of the greatest cultural institutions to shape the narrative, historian and academic Owen Hopkins draws on his deep knowledge of the field to outline the history of the museum movement. Tracking the evolution from princely collections in Europe and the Enlightenment's classically inspired temples of curiosities via the public museums of the late nineteenth century on to today's global era of iconic buildings designed by the world's leading architects, this book is a vital work for anyone seeking to understand the development of the museum into what it is today. Over the course of five chapters filled with stunning imagery that highlights the beauty of these venerated buildings, the origins of key institutions are revealed, including Louvre, Metropolitan Museum of Art, British Museum, Tate Modern, The Hermitage, Guggenheim, Smithsonian Institute, Acropolis Museum. Also outlined are the motivations of the architects, curators and patrons who have shaped how we experience the modern museum, a cast that includes names such as King George II, Napoleon, Henry Clay Frick, Peggy Guggenheim, Andrew Carnegie, Alfred Barr, Frank Lloyd Wright, Le Corbusier, Frank Gehry, Richard Rogers, Nicholas Serota and Zaha Hadid. By examining how these venues became intrinsic to our shared cultural experience, analysing the changing roles they play in society and questioning what the future holds in a digital age, this book is for anyone who has stood in awe at the spectacle of a museum.

Museums and American Intellectual Life, 1876-1926 Steven Conn,1998 Conn s study includes familiar places like the Metropolitan Museum of Art and the Academy of Natural Sciences but he also draws attention to forgotten ones like the Philadelphia Commercial Museum once the repository for objects from many turn of the century world s fairs What emerges from Conn s analysis is that museums of all kinds shared a belief that knowledge resided in the objects themselves Using what Conn has

termed object based epistemology museums of the late nineteenth century were on the cutting edge of American intellectual life By the first quarter of the twentieth century however museums had largely been replaced by research oriented universities as places where new knowledge was produced According to Conn not only did this mean a change in the way knowledge was conceived but also and perhaps more importantly who would have access to it **Illustrated Catalog**
