Agatha Christie's work was serialized in the most prestigious magazines and newspapers of the day often under an array of different titles prior to being published by Collins and Dodd Mead and Company. Second serial rights could result in a single title being syndicated to over 40 newspapers. Over the decades numerous records have been lost or destroyed and keeping track of her literary legacy has proved a major challenge for her publishers, literary agents and others until now. Jared Cade, author of the ground-breaking biography *Agatha Christie and the Eleven Missing Days*, has unearthed a huge plethora of hitherto unknown facts about the timeline of her publishing history that will delight her devotees and enable future generations to write about her work with far greater authority and accuracy than ever before, especially when correlating her publications to the parallels in her life. Illustrated with rare pictures, *Secrets from the Agatha Christie Archives* is destined to become an essential reference tool for fans, librarians, scholars, antiquarian booksellers, broadcasters and others interested in the making of one of the 20th century's most beloved writers. Jared Cade is an acknowledged authority on Christianna Crime Time.

Language in the Real World challenges traditional approaches to linguistics to provide an innovative introduction to the subject. By first examining the real world applications of core areas of linguistics and then addressing the theory behind these applications, this text offers an inductive, illustrative and interactive overview for students. Key areas covered include animal communication, phonology, language variation, gender and power, lexicography, translation, forensic linguistics, language acquisition, ASL and language disorders. Each chapter, written by an expert in the field, is introduced by boxed notes listing the key points covered and features an author's note to readers that situates the chapter in its real world context. Activities and pointers for further study and reading are also integrated into the chapters and an end of text glossary is provided to aid study. Professors and students will benefit from the interactive Companion Website that includes a student section featuring comments and hints on the chapter exercises within the book, a series of flash cards to test knowledge and further reading and links to key resources. Material for professors includes essay and multiple choice questions based on each chapter and additional general discussion topics.
