Mexican Architects A Contemporary Vision:

Arquitectos Mexicanos Fernando de Haro Lebrija, Omar Fuentes, 2004 A home implies an active combination and interaction of many elements This is a passionate challenge for any architect one that requires the use of his or her entire craft and professional resources to achieve an objective But it even goes beyond that it also involves a deep personal and emotional investment with the design theme and the incredible responsibility associated with it With this perspective in mind it is highly rewarding to analyze how each architect reached the different design solutions presented on the following pages One discovery is that of a common denominator that diversity is what drives and characterizes contemporary architecture as an expression of the times we live in , **Sveranda Il Cielo in Una Stanza** , **Case Di Campagna N.114** , Latin American Modern Architectures Patricio del Real, Helen Gyger, 2013-06-03 Latin American Modern Architectures Ambiguous Territories has thirteen new essays from a range of distinguished architectural historians to help you understand the region s rich and varied architecture It will also introduce you to major projects that have not been written about in English A foreword by historian Kenneth Frampton sets the stage for essays on well known architects such as Lucio Costa and Flix Candela which will show you unfamiliar aspects of their work and for essays on the work of little known figures such as Uruguayan architect Carlos Gmez Gavazzo and Peruvian architect and politician Fernando Bela nde Terry Covering urban and territorial histories from the nineteenth and twentieth centuries along with detailed building analyses this book is your best source for historical and critical essays on a sampling of Latin America s diverse architecture providing much needed information on key case studies Contributors include Noem Adagio Pedro Ignacio Alonso Luis Casta eda Viviana d Auria George F Flaherty Mar a Gonz lez Pend s Cristina L pez Uribe Hugo Mondrag n L pez Jorge Nudelman Blejwas Hugo Palmarola Sagredo Gaia Piccarolo Claudia Shmidt Daniel Talesnik and Paulo Tavares *Contemporary Architects* Muriel Emanuel, 2016-01-23 **Race and Modern Architecture** Irene Cheng, Charles L. Davis II, Mabel O. Wilson, 2020-05-26 Although race a concept of human difference that establishes hierarchies of power and domination has played a critical role in the development of modern architectural discourse and practice since the Enlightenment its influence on the discipline remains largely underexplored This volume offers a welcome and long awaited intervention for the field by shining a spotlight on constructions of race and their impact on architecture and theory in Europe and North America and across various global contexts since the eighteenth century Challenging us to write race back into architectural history contributors confront how racial thinking has intimately shaped some of the key concepts of modern architecture and culture over time including freedom revolution character national and indigenous style progress hybridity climate representation and radicalism By analyzing how architecture has intersected with histories of slavery colonialism and inequality from eighteenth century neoclassical governmental buildings to present day housing projects for immigrants Race and Modern Architecture challenges complicates and revises the standard association of modern architecture with a universal project of emancipation

Constructing Identity in Contemporary Architecture Peter Herrle, Stephanus Schmitz, 2009 The global spread of uniform modes of production and cultural values has been accompanied by a dissemination of stereotypes of modern architecture styles almost everywhere around the globe Paradoxically the reverse process has also emerged In some countries the elites feel the necessity to counterbalance the loss of identity and defend their own cultures against the intruding forces of globalization What started as a defensive notion has developed into a more progressive attempt to re create what has allegedly been lost This trend is being strongly expressed in discourses about architecture in countries of the South Who are the actors feeling compelled to construct new identities How are these new identities in architecture created in various parts of the world And which are the ingredients borrowed from various historical and ethnic traditions and other sources These and other questions are discussed in five case studies from different parts of the world written by renowned scholars from Brazil Mexico Egypt India and Singapore *The Architecture and Cities of Northern Mexico from Independence to the Present* Edward Burian, 2015-08-15 The states of Northern Mexico Tamaulipas Nuevo Leon Coahuila Chihuahua Durango Sonora Sinaloa and Baja California Norte and Sur have architecture urbanism and landscape design that offer numerous lessons in how to build well but this constructed environment is largely undervalued or unknown To make this architecture better known to a wide professional academic and public audience this book presents the first comprehensive overview in either English or Spanish of the architecture urban landscapes and cities of Northern Mexico from the country's emergence as a modern nation in 1821 to the present day Profusely illustrated with color and black and white photographs maps and analytical drawings of urban cores of major cities The Architecture and Cities of Northern Mexico systematically examines significant works of architecture in large cities and small towns in each state from the earliest buildings in the urban core to the newest at the periphery Edward R Burian describes the most memorable works of architecture in each city in greater detail in terms of their spatial organization materials and sensory experience He also includes a concise geographical and historical summary of the region that provides a useful background for the discussions of the works of architecture Burian

concludes the book with a brief commentary on lessons learned and possible futures for the architectural culture of the region as well as the first comprehensive biographical listing of the architects practicing in Northern Mexico during the past two centuries
