the Dominican Republic Mexico Peru Uruguay and Venezuela **Privatization and Political Change in Mexico** Judith A. Teichman, 2010-11-23 Since 1983 Mexico has undergone a rapid and thorough economic restructuring program with privatization at the core The government has divested itself of hundreds of public companies increasing the role of private capital both domestic and foreign Supporters have argued that divestiture would have positive implications for Mexican democracy but Judith A Teichman concludes that political and economic power in Mexico is more concentrated and exclusionary than ever She uses extensive field research including interviews with top political and business leaders to describe and analyze the process by which the Mexican state has reformed its mammoth public enterprise sector

Revival: State-Society Relations in Mexico (2001) Kenneth Edward Mitchell, 2017-07-12 This title was first published in 2001 This detailed empirical study illustrates the different sources of political and economic pressure that combine to produce a process of incremental innovation in Mexican state society relations Invaluable to political economists who have a specific focus on Latin America Mexican politics and public sector reform **Made in Mexico** Susan M. Gauss, 2015-09-10 The experiment with neoliberal market oriented economic policy in Latin America popularly known as the Washington Consensus has run its course With left wing and populist regimes now in power in many countries there is much debate about what direction economic policy should be taking and there are those who believe that state led development might be worth trying again Susan Gauss s study of the process by which Mexico transformed from a largely agrarian society into an urban industrialized one in the two decades following the end of the Revolution is especially timely and may have lessons to offer to policy makers today The image of a strong centralized corporatist state led by the Partido Revolucionario Institucional PRI from the 1940s conceals what was actually a prolonged messy process of debate and negotiation among the postrevolutionary state labor and regionally based industrial elites to define the nationalist project Made in Mexico focuses on the distinctive nature of what happened in the four regions studied in detail Guadalajara Mexico City Monterrey and Puebla It shows how industrialism enabled recalcitrant elites to maintain a regionally grounded preserve of local authority outside of formal ruling party institutions balancing the tensions among centralization consolidation of growth and Mexico s deep legacies of regional authority **Cycles of Conflict, Centuries of Change** Elisa Servín, Leticia Reina, John Tutino, 2007-07-17 Anthology about three of the persistent crises that have wracked Mexican society throughout its modern history asking why these ruptures occurred why they mobilized Mexicans of all social classes and why some led to significant political transformation The Politics of Clientelism John Martz, 2017-12-02 In Latin America the state is the prime regulator coordinator and pace setter of the entire national system the apex of the pyramid from which patronage wealth power and programs flow The state bears responsibility for the realization of civic needs providing goods and services to each citizen Doing so requires the exercise and maintenance of social and political control It is John Martz s contention that clientelism underlines the fundamental character of Latin American social and political life As the modernizing bureaucratic state has

developed in Latin America there has been a concurrent shifting away from clientelistic relationships Yet in one form or another political clientelism still remains central Clientelism occurs when large numbers of low status individuals such as those in the slums of rural and underdeveloped areas are protected by a powerful patron who defends their interests in return for deference or material reward In Colombia the rural patron has become a member of the higher clientelistic system as well he is dependent on a patron who operates at the national level This enables urban elites to mobilize low status clients for such acts as mass demonstrations of political loyalty to the regime Thus traditional clientelism has been modified through the process of modernization Part One of *The Politics of Clientelism* examines Colombian politics focusing on the incarnation and traditional forms of clientelism Part Two explores the policies of Colombian governance from the administrations of Lleras Camargo through Julio Cesar Turbay Ayala Part Three discusses the modernization and restructuring of Colombia in recent decades under Belisario Betancur Virgilio Barco and Cesar Gaviria As the modernizing bureaucratic state has unfolded there has been a similar shift in many clientelistic relationships Martz argues that whether corporate clientelism remains or more democratic organization develops

Searching for Rural Development Merilee S. Grindle, 2019-01-24

Throughout the Third World rural people must leave their homes in ever greater numbers to seek temporary work in urban centers in distant rural areas or across international borders This temporary labor migration less an option than a necessity for many is symptomatic of rural stagnation and increasing economic dependence and is most prevalent in regions where the base for agricultural development is poor *Searching for Rural Development* addresses the critical question of how rural development strategies can help provide more secure livelihoods for the millions who are now unable to sustain themselves and their families in local communities Focusing on Mexico Merilee S Grindle examines how

rural families adapt to the paucity of local employment opportunities by pursuing complex strategies of income diversification She assesses various options for creating jobs in rural and semirural areas and considers how recommended rural development policies can be implemented through the political process Urban Leviathan Diane Davis,2010-06-18 The story of crippling overdevelopment in Mexico s economic and social center **Women and Survival in Mexican Cities** Sylvia H. Chant,1991 On the basis of interviews with low income households and local employers this study attempts to provide an analysis of the articulations between women employment and household survival strategies in contemporary urban Mexico *Democratization Without Representation* Kenneth C. Shadlen,2015-11-09 When countries become more democratic new opportunities arise for individuals and groups to participate in politics and influence the making of policy But democratization does not ensure better representation for everyone and indeed some sectors of society are ill equipped to take advantage of these new opportunities Small industry in Mexico Kenneth Shadlen shows is an excellent example of a sector whose representation decreased during democratization Shadlen s analysis focuses on the basic characteristics of small firms that complicate the process of securing representation in both authoritarian and democratic environments He then shows how increased pluralism and electoral competition served to exacerbate the political problems facing the sector during the course of democratization in Mexico These characteristics created problems for small firms both in acting collectively through interest associations and civil society organizations and in wielding power within political parties The changes that democratization effected in the structure of corporatism put small industry at a significant disadvantage in the policy making arena even while there was general agreement on the crucial importance of this sector in the new neoliberal economy especially for generating employment The final chapter extends the analysis by making comparisons with the experience of small industry representation in Argentina and Brazil Shadlen uses extensive interviews and archival research to provide new evidence and insights on the difficult challenges of interest aggregation and representation for small industry He conducted interviews with a wide range of owners and managers of small firms state and party officials and leaders of business associations and civil society organizations He also did research at the National Archives in Mexico City and in the archives of the most important business organizations for small industry in the post World War II period **Debt And Democracy In Latin America** Barbara Stallings,Robert Kaufman,1989-01-19 Begins with analyses of the international dimension of this crisis considering reactions of business labor organizations and the private banking community A cross national comparison of responses is offered through a series of case studies Paper edition 14 95 Annotation copyrighted by Book News Inc Portland OR **Terms of Inquiry** James W. Davis,2005-06-07 Introduction Of concepts and conceptualization Scientific concepts and the study of politics If maybe Social behavior and the indeterminacy of norms Methods for the production of practical knowledge Forming Economic Policy Fen Osler Hampson,2013-11-07 How do governments make key decisions on vital economic questions of national importance Can they advance the national interest

on issues that are highly politicized How do they respond to competing pressures from the international and domestic environments Forming Economic Policy explores these and other questions in Canada and Mexico two very different countries which share a common vulnerability to the world economy Using the case of energy the book argues that policymakers will address the national interest but only episodically with the onset of major national crises that invoke a higher and sustained sense of national priorities These crises are frequently induced by the interaction of domestic and foreign political and economic forces The conclusions are surprising Despite profound political and economic differences between these two countries policymakers have behaved in remarkably similar ways when arriving at key policy decisions The explanation which integrates two competing views of politics the pluralist and the statist has important implications with regard to the political processes in those states which like Canada and Mexico are exposed to the world economy and face problems of political legitimacy at home Forming Economic Policy will appeal to students and teachers of political economy and comparative politics as well as to those interested in the politics of energy policy
