

Mexico: Overview of Oil and Gas Industry

Mexican Oil Natural Gas

Manuel R. Millor

Mexican Oil Natural Gas:

Mexican Oil and Natural Gas Richard B. Mancke, 1979 *Mexico's Oil and Gas Sector* Congressional Research Service, 2014-10-23

The future of oil and natural gas production in Mexico is of importance for both Mexico's economic growth as well as for U.S. energy security, a key congressional interest. Mexico is a top trade partner and crude oil supplier to the United States. Mexico's state oil company, Petroleos Mexicanos (Pemex), remains an important source of government revenue even as it is struggling to counter declining oil production and reserves. Due to an inability to meet rising demand, Mexico has also significantly increased natural gas imports from the United States. Still, gas shortages have hindered the country's economic performance, including in manufacturing sectors that are highly integrated with U.S. industries.

On December 20, 2013, Mexican President Enrique Peña Nieto signed historic constitutional reforms related to Mexico's energy sector aimed at reversing oil and gas production declines. On August 11, 2014, secondary laws to implement those reforms officially opened Mexico's oil, natural gas, and power sectors to private investment. As a result, Pemex can now partner with international companies that have the experience and capital required for exploring Mexico's vast deep water and shale resources. Leftist parties and others remain opposed to the reforms, however, maintaining that the reforms cede control over Mexico's natural resources without ensuring that those resources are developed in a sustainable way that benefits the Mexican people. Opponents hope to convene a popular referendum on the reforms during the 2015 mid-term elections, but Mexico's Supreme Court may not allow it to take place.

The energy reforms transform Pemex into a productive state enterprise with more autonomy and a lower tax burden than before, but make it subject to competition with private investors. They create different types of contracts for private companies interested in investing in Mexico, including production sharing and licensing, allow companies to post reserves for accounting purposes, establish a sovereign wealth fund, and create new regulators. In August, Mexico's Secretariat of Energy announced the results of Round Zero, which defines the exploratory and production areas that Pemex can retain. Pemex is likely to partner with private companies to exploit many of those areas. The first round of public bidding is expected in 2015.

The U.S. Congress has legislative and oversight interests in examining the potential implications of Mexico's oil and natural gas reforms on U.S. hydrocarbons imports and exports, bilateral trade and investment, and economic conditions in Mexico. Congress approved the U.S.-Mexico Transboundary Hydrocarbons Agreement in December 2013 (P.L. 113-67, the Bipartisan Budget Act of 2013). That agreement is intended to facilitate joint development of oil and natural gas in part of the Gulf of Mexico. In June 2014 and again in September 2014, the House approved measures (H.R. 3301, H.R. 2) with provisions to ensure the continued development of infrastructure to export natural gas to Mexico. The opening of Mexico's oil and natural gas sector could expand U.S.-Mexico energy trade and provide opportunities for U.S. companies involved in the hydrocarbons sector, as well as infrastructure and other oil field services. If these reforms accelerate growth and investment in Mexico, as the government has stated, they could also benefit North American

competitiveness Industry analysts maintain that the reforms are generally well designed but that the way they are implemented will likely determine whether they prove to be as transformative as the Mexican government expects

Mexico's Oil Manuel R. Millor, 2019-03-04 Analyzing the effects of Mexico's newly flourishing petroleum industry Dr Millor first traces the evolution of Mexico's oil development and provides a detailed assessment of its socioeconomic political and ecological consequences and of the Mexican government's current energy policies In his subsequent examination of U S Mexican relations he emphasizes that aside from the issues directly related to Mexico's petroleum a complex assortment of concerns remain unresolved between the two nations illegal immigration drug traffic terms of technical and scientific cooperation restrictions on Mexican exports in the U S market and the more assertive foreign policy stance recently taken by Mexico Dr Millor argues that far from representing a clear case of positive growth for Mexico petroleum could bring about distorted development and increased dependency as well as a difficult period of relations with the U S If a stable association between the two governments is to emerge he concludes U S policymakers must understand the changes taking place in Mexico and accept its emergence as a middle power with autonomous goals Representing both the Mexican and the U S point of view this study contributes much to a better understanding of the significance of oil for Mexican development and to a balanced assessment of present and future U S Mexican relations

The Politics of Mexican Oil George Grayson, 1981-04-15 The Mexican oil boom of the 1970s brought great hope and prosperity with it George Grayson shows the influence of oil and the oil sector both within Mexican society and in its relations with other nations He traces the development of the oil industry from its beginnings in 1901 up until the 1980s looking at topics that include the history of expropriation the creation of the state run company Petrleos Mexicanos graft and corruption within the Oil Workers Union Mexico's relations with OPEC the political nuances of oil and gas agreements with the United States and the prospects for the Mexican oil industry and domestic reforms generated from oil revenue
