Nowotny, 2005

Appearing for the first time in English Karl Anton Nowotny's *Tlacuilolli* is a classic work of Mesoamerican scholarship. A concise analysis of the pre-Columbian Borgia Group of manuscripts, it is the only synthetic interpretation of divinatory and ritual codices from Mexico. Originally published in German and unavailable to any but the most determined scholars, *Tlacuilolli* has nevertheless formed the foundation for subsequent scholarly works on the codices. Its importance extends beyond the study of Mexican codices. Nowotny's sophisticated reading of these manuscripts informs our understanding of Mesoamerican culture. Of particular importance are Nowotny's corrections of errors in fact and interpretation in the Spanish edition of Eduard Seler's commentary on the Borgia Group. George A. Everett and Edward B. Sisson have translated Nowotny's masterwork into English while maintaining the flavor of the original German edition. To the core text, they have added an extensive bibliography and constructed a framework of annotation that relates the principles in *Tlacuilolli* to current research. This edition includes a selection of eleven stunning full-color images chosen from the original catalog.

Reshaping the World Ana Díaz, 2020-04-01

Reshaping the World is a nuanced exploration of the plurality, complexity, and adaptability of Precolumbian and colonial-era Mesoamerican cosmological models and the ways in which anthropologists and historians have used colonial and indigenous texts to understand these models in the past. Since the early twentieth century, it has been popularly accepted that the Precolumbian Mesoamerican cosmological model comprised nine fixed layers of underworld and thirteen fixed layers of heavens. This layered model, which bears a close structural resemblance to a number of Eurasian cosmological models derived in large part from scholars' reliance on colonial texts such as the post-Spanish Conquest Codex Vaticanus A and Florentine Codex, is reanalyzed and recontextualized by examining both indigenous and colonial texts and imagery in nine case studies examining Maya, Zapotec, Nahuatl, and Huichol cultures. The contributors discuss and challenge the commonly accepted notion that the cosmos was a static structure of superimposed levels unrelated to and unaffected by historical events and human actions. Instead, Mesoamerican cosmology consisted of a multitude of cosmographic repertoires that operated simultaneously as a result of historical circumstances and regional variations. These spaces were and are dynamic elements shaped, defined, and redefined throughout the course of human history. Indigenous cosmographies could be subdivided and organized in complex and diverse arrangements as components in a dynamic interplay which cannot be adequately understood if the cosmological discourse is reduced to a superposition of nine and thirteen levels. Unlike previous studies which focus on the reconstruction of a pan-Mesoamerican cosmological model, *Reshaping the World* shows how the movement of people, ideas, and objects in New Spain and neighboring regions produced a deep reconfiguration of Prehispanic cosmological and social structures, enriching them with new conceptions of space and

time The volume exposes the reciprocal influences of Mesoamerican and European theologies during the colonial era offering expansive new ways of understanding Mesoamerican models of the cosmos Contributors Sergio Botta Ana D az Kerry Hull Katarzyna Mikulska Johannes Neurath Jesper Nielsen Toke Sellner Reunert David Tav rez Alexander Tokovinine Gabrielle Vail **General Catalogue of Printed Books** British Museum.
