Ochoa, 2001-09-01 Winner of the 1998 Michael C Meyer Manuscript Prize *Feeding Mexico The Political Uses of Food since 1910* traces the Mexican government's intervention in the regulation production and distribution of food from the days of Cardenas to the recent privatization inspired by NAFTA Professor Ochoa argues that the real goals of the government's food subsidies were political driven by presidential desires to court urban labor Many of the agencies and policies were hastily set in place in response to short term political or economic crises Since the goals were not to alleviate poverty but to provide modest subsidies to urban consumers the policies did not eliminate destitution or malnutrition in the country Despite the minimal achievements of these interventionist policies the State Food Agency provided a symbol of the state's concern for the workers The elimination of the Agency in the 1990s prompted social protest and unrest *Feeding Mexico* is the first study to examine the creation of networks to deliver food products the relationship of these channels of distribution to the food crisis and the role of the state in trying to ameliorate the problem Based on exhaustive research of new archival material and richly documented with statistical tables this book exposes the dynamics and outcome of social policy in twentieth century Mexico *This Is Mexico City* Abby Clawson Low, 2018-10-02 This stylish gorgeously photographed guide to Mexico City will help you get the most out of this vibrant culturally rich destination or make you want to plan a trip Vast and exciting Mexico City has so much to offer from museums to markets architectural wonders to Aztec monuments This thorough and practical travel guide includes everything you need

Mexico's Political Stability Roderic Ai Camp, 2019-08-28 Mexico is undergoing its worst economic crisis since the world depression of the 1930s In this volume contributors analyze significant patterns that might affect political stability and legitimacy economic viability and social change over the next several years often reaching controversial conclusions They argue for example that the military is not likely to change its present civil military role that political opposition rather than political violence or pressure from foreign governments will have the most profound influence on the changing pattern of political legitimacy and system stability and that decision making in the private sector may have the greatest potential to resolve or exacerbate the current crisis Finally they suggest that because economic conditions have been altered so dramatically in the recent period Mexican policymakers will need to develop a new range of political alternatives to stabilize the economy and redirect the country's future **Food and Culture** Carole Counihan, Penny Van Esterik, Alice Julier, 2018-12-07 This innovative and global best seller helped establish food studies courses throughout the social sciences and humanities when it was first published in 1997 The fourth edition of Food and Culture contains favorite articles from earlier editions and several new pieces on food politics globalism agriculture and race and gender identity

Food Policy in Mexico James Austin, 2019-05-15 Food self sufficiency is high among the priorities of most Third World countries yet there are relatively few detailed studies dealing with their attempts to reach this goal A team of twenty experts academics policymakers advisers and managers here address key issues underlying self sufficiency strategies through an examination of the Sistema Alimentario Mexicano SAM Mexican Food System a program designed to coordinate food production with distribution and consumption The Neoliberal Diet Gerardo Otero, 2018-10-03 This remarkable comprehensive study of neoliberal agribusiness and the obesity epidemic is critical reading for food studies scholars Contemporary Sociology Obesity rates are rising across the United States and beyond While some claim that people simply eat too much energy dense food while exercising too little The Neoliberal Diet argues that the issue is larger than individual lifestyle choices Since the 1980s the shift toward neoliberal regulation has enabled agribusiness multinationals to thrive by selling a combination of meat and highly processed foods loaded with refined flour and sugars a diet that originated in the United States Drawing on extensive empirical data Gerardo Otero identifies the socioeconomic and political forces that created this diet which has been exported around the globe at the expense of people's health Otero shows how state level

actions particularly subsidies for big farms and agribusiness have ensured the dominance of processed foods and made fresh foods inaccessible to many Comparing agrifood performance across several nations including the NAFTA region and correlating food access to class inequality he convincingly demonstrates the structural character of food production and the effect of inequality on individual food choices Resolving the global obesity crisis Otero concludes lies not in blaming individuals but in creating state level programs to reduce inequality and make healthier food accessible to all Cycles of Conflict, Centuries of Change Elisa Servín, Leticia Reina, John Tutino, 2007-07-17 Anthology about three of the persistent crises that have wracked Mexican society throughout its modern history asking why these ruptures occurred why they mobilized Mexicans of all social classes and why some led to significant political transformation **The Politics of Food in Mexico** Jonathan Fox, 1993 Compares a range of Mexican food policy reforms focusing on the SAM Mexican Food System a program in place from 1980-82 designed to shift subsidies and privileged access from large private farmers and ranchers to peasants and small producers In this context Fox political science MIT examines the limits and possibilities of political reform and its history and future in the Mexican state Annotation copyright by Book News Inc Portland OR
