Mazarr, Center for Strategic and International Studies (Washington, D.C.), CSIS Global Trends 2005 Study (United States), 1999 **American Book Publishing Record** ,2006 **Homeland Security** James J. F. Forest, 2006-06-30 America is a target the homeland is under threat While Americans have been targets of terrorist attacks for quite some time September 11 2001 awoke the nation to the reality that we are vulnerable in our homes our places of work and worship and our means of public transportation And

yet we must continue to function as best we can as the world's most vibrant economic and political community. The current threat environment requires greater engagement with the public as the necessary eyes and ears of the nation's homeland security infrastructure. However, to be effective, the public must be equipped with the knowledge of where and why specific locations and activities may be a terrorist target, what is being done to protect those targets, and how they can help. This three-volume set answers that need. The chapters of each volume of Homeland Security revolve around a core of central questions: Are we safer today than we were pre 9/11? What steps have been taken in all these areas to protect ourselves? What are the threats we face, and what new threats have developed since 9/11? Are we staying one step ahead of those who wish to do us harm? In 2002, more than 400 million people, 122 million cars, 11 million trucks, 2.4 million freight cars, and 8 million containers entered the United States. Nearly 60,000 vessels entered the United States at its 301 ports of entry. Clearly, the amount of activity this represents will require a long-term commitment to innovation, organizational learning, and public vigilance to complement an already overstretched network of government agencies and security professionals.

Latin America and the Caribbean Brian W. Blouet, Olwyn M. Blouet, 2006. Within a strong geographical and historical framework, this edition discusses contemporary Latin American issues such as environmental problems, population pressure, migration, drugs, and economic development. It includes updated maps and photographs and new interludes on Cancun and the Yucatan.

A Twenty-First Century U.S. Water Policy Juliet Christian-Smith, Peter H. Gleick, Heather Cooley, 2012-08-23. It is zero hour for a new US water policy. At a time when many countries are adopting new national approaches to water management, the United States still has no cohesive federal policy, and water-related authorities are dispersed across more than 30 agencies. Here at last is a vision for what we as a nation need to do to manage our most vital resource. In this book, leading thinkers at world-class water research institution the Pacific Institute present clear and readable analysis and recommendations for a new federal water policy to confront our national and global challenges at a critical time. What exactly is at stake? In the 21st century, pressures on water resources in the United States are growing, and conflicts among water users are worsening. Communities continue to struggle to meet water quality standards and to ensure that safe drinking water is available for all. And new challenges are arising as climate change and extreme events worsen, new water quality threats materialize, and financial constraints grow. Yet the United States has not stepped up with adequate leadership to address these problems. The inability of national policymakers to safeguard our water makes the United States increasingly vulnerable to serious disruptions of something most of us take for granted: affordable, reliable, and safe water. This book provides an independent assessment of water issues and water management in the United States, addressing emerging and persistent water challenges from the perspectives of science, public policy, environmental justice, economics, and law. With fascinating case studies and first-person accounts of what helps and hinders good water management, this is a clear-eyed look at what we need for a 21st-century U.S. water policy.
