Mexico And Guatemala:

Contraband Corridor Rebecca Berke Galembo, 2017-12-26 The Mexico Guatemala border has emerged as a geopolitical hotspot of illicit flows of both goods and people Contraband Corridor seeks to understand the border from the perspective of its long term inhabitants including petty smugglers of corn clothing and coffee Challenging assumptions regarding security trade and illegality Rebecca Berke Galembo details how these residents engage in and justify extralegal practices in the context of heightened border security restricted economic opportunities and exclusionary trade policies Rather than assuming that extralegal activities necessarily threaten the state and formal economy Galembo's ethnography illustrates the complex ways that the formal informal legal and illegal economies intertwine Smuggling basic commodities across the border provides a means for borderland peasants to make a living while neoliberal economic policies decimate agricultural livelihoods Yet smuggling also exacerbates prevailing inequalities obstructs the possibility of more substantive political and economic change and provides low risk economic benefits to businesses state agents and other illicit actors often at the expense of border residents Galembo argues that securitized neoliberalism values certain economic activities and actors while excluding and criminalizing others even when the informal and illicit economy is increasingly one of the poor's only remaining options Contraband Corridor contends that security neoliberalism and illegality are interdependent in complex ways yet how they unfold depends on negotiations between diverse border actors

focus on the problems inhabitants of the region have faced over the years the realities of a porous border the existence of family trade and cultural ties that surpass the administrative limits negotiated by the states late in the 19th century the impact of the internal conflicts of neighbour countries in the border space experiences of exile and refuge at the border and the violence they entail the role of local authorities in managing regional problems the pending task of cross border territorial organization the efforts of local institutions to promote regional development and the presence of phenomena like contraband drug trafficking organized crime and human trafficking in an increasingly complex and challenging space This provides a way to use the region s history as a springboard for conceiving of mechanisms by which we can together face the challenges presented today to the inhabitants of the cross border region between Mexico Guatemala and Belize This book will be a valuable resource for students and scholars of Latin American history and Social History
