Pathways to Complexity M.

Kathryn Brown, George J. Bey III, 2021-04-27 *Pathways to Complexity* synthesizes a wealth of new archaeological data to illuminate the origins of Maya civilization and the rise of Classic Maya culture. In this volume prominent Maya scholars argue that the development of social religious and economic complexity began during the Middle Preclassic period 1000-300 B.C. hundreds of years earlier than previously thought. Contributors reveal that villages were present in parts of the lowlands by 1000 B.C. challenging the prevailing models estimating when civilization took root in the area. Combining recent discoveries from the northern lowlands an area often neglected in other volumes and the southern lowlands the collection then traces the emergence of sociopolitical inequality and complexity in all parts of the Yucatan peninsula over the course of the Middle Preclassic period. They show that communities evolved in different ways due to influences such as geographical location ceramic exchange shell ornament production agricultural strategy religious ritual ideology and social rankings. These varied pathways to complexity developed over half a millennium and culminated in the institution of kingship by the Late Preclassic period. Presenting exciting work on a dynamic and poorly understood time period *Pathways to Complexity* demonstrates the importance of a broad comparative approach to understanding Preclassic Maya civilization and will serve as a foundation for future research and interpretation. La alfarería en el México antiguo: ¿cómo cubre escasos 400-4500 años la diferencia de la presencia humana en nuestro territorio? Sin embargo desde el mismo momento de su utilización la cerámica es una de las herramientas primordiales con que cuenta el investigador para ubicar con cierta precisión temporal al grupo humano que fabricó y utilizó este elemento en su vida cotidiana de ahí la importancia del estudio de la Producción alfarera en México.
