global disruption to education caused by the COVID 19 pandemic is without parallel and the effects on learning are severe
The crisis brought education systems across the world to a halt with school closures affecting more than 1 6 billion learners
While nearly every country in the world offered remote learning opportunities for students the quality and reach of such
initiatives varied greatly and were at best partial substitutes for in person learning Now 21 months later schools remain
closed for millions of children and youth and millions more are at risk of never returning to education Evidence of the
detrimental impacts of school closures on children s learning offer a harrowing reality learning losses are substantial with
the most marginalized children and youth often disproportionately affected Countries have an opportunity to accelerate
learning recovery and make schools more efficient equitable and resilient by building on investments made and lessons
learned during the crisis Now is the time to shift from crisis to recovery and beyond recovery to resilient and transformative
