Macro Social Influences on Loneliness in Later Life Marja Aartsen, Iuliana Precupetu, Bianca Suanet, 2025-07-31 This open access book explores the macro social influences on loneliness in later life emphasizing how societal structures cultural contexts and broader social transformations shape the experience of loneliness Dedicated to the social construction of loneliness and the notable heterogeneity in its prevalence across European countries this volume brings together a distinguished selection of experts who share their latest insights on meso and macro level influences cultural and structural theories and the impact of digitalization climate change and societal crises Divided into five parts the book addresses key aspects of this complex issue The first part introduces the central themes outlining the relevance of loneliness as a societal concern and discussing the limitations of existing research which predominantly focuses on individual level factors It highlights the need for a multi level approach that incorporates micro meso and macro perspectives to fully understand the contextual influences on loneliness The second part delves into theoretical perspectives offering a comprehensive framework for understanding loneliness at different levels It examines the interplay between individual relational and societal factors while also exploring cultural and social exclusion perspectives that shed light on how loneliness manifests across different contexts The third part presents empirical evidence focusing on variations in loneliness across different social groups and regions in Europe It synthesizes research on micro and meso level determinants while also providing a review of macro level influences This part highlights the role of welfare regimes demographic trends and broader societal conditions in shaping the prevalence and experience of loneliness The fourth part explores recent societal developments that may influence loneliness including digitalization migration climate change and societal crises These emerging topics illustrate how macro level transformations can either alleviate or exacerbate loneliness depending on how they interact with existing social structures and individual circumstances The final part discusses methodological advancements and policy implications It introduces an innovative approach to analyzing macro social influences on loneliness and revisits the loneliness paradox in light of new findings The book concludes with policy recommendations and future research directions emphasizing the need for a holistic approach that integrates individual relational and societal dimensions to develop more effective interventions against

loneliness In sum by adopting a macro social lens this book contributes to a deeper understanding of the societal cultural and policy related determinants of loneliness It offers a foundation for evidence based interventions that go beyond individual level solutions recognizing loneliness as a socially embedded phenomenon shaped by broader societal forces It is our hope and expectation that the book and its content will fundamentally change our understanding of loneliness and strategies to combat it
