Missouri Bird Watching Bill Thompson, III, 2005-03-29. Bird watching is a regional hobby, and the birds that frequent the backyards of Missouri differ from the birds found in Michigan. This series targets beginning and intermediate bird watchers from each Midwestern state. The books are state specific and highlight the birds that are found in each state. In addition to the profile, each bird entry includes a map to identify the specific range covered by the bird. Full color seasonal section informs the reader of the migrating birds that can be seen that month, the foods that attract those birds, and the plants that can assist in attracting birds.
