Miceeducational Psychology:

Handbook of Positive School Psychology Gökmen Arslan, Murat Yıldırım, 2024-04-26 Students spend significantly more time in school compared to any other formal institution during their lives therefore mental health in schools has attracted a lot of attention in recent years According to Seligman et al 2009 positive psychology in school is a response to the gap between what people want for their children and what schools teach That is most parents want their children to be happy healthy and confident but schools only focus on achievement discipline and academic skills These are of course important but so are positive mental health outcomes To fix this gap schools must teach achievement and accomplishment along with positive psychology informed mental health skills In other words positive education aims to bring positive psychology's goals of well being and mental health support for everyone into the school setting Psychological interventions have been around in schools since at least the 1930s Therefore it makes sense to supplement the already existing traditional psychology in schools with positive psychology In the field of psychology positive psychology interventions are defined as those aimed at raising positive feelings positive thoughts and positive behaviour and increasing well being Positive Psychology Interventions in schools have been shown to improve mental health and well being outcomes for students Recent research has confirmed the same results as offering emotional support early in a school year can lead to improved instructional quality later in that school year In other words positive school psychology interventions offer a focus on mental health in order to set the stage and give students the opportunity for academic achievement Since the beginning of the positive psychology movement the application of its assumptions in schools has been one of the movement's main pillars The objective of the book is to help counsellors teachers and school leaders engage in a positive psychology research based practice in schools

Andrzejewski, 2021-05-18 The Grammar of School Discipline examines how seemingly discrete school discipline policies and practices constitute a particular grammar Removal Resistance and Reform Weaving numeric data with portraits of students and school practitioners the authors detail a nuanced landscape of school discipline in Alabama and its anti Black foundations The removal of Black students can be traced to the antebellum construction of Blackness as criminal deviant and deserving of punishment A focus on resistance centers the agency that students and practitioners exercise despite anti Black removal An exploration of specific reform efforts emphasizes that even the most well intentioned and well organized reforms are limited when the removal of students remains an option for practitioners The authors end with an appeal to educational stakeholders to repair the harms that these anti Black policies and practices inflict on students and communities and thus move towards repairing the damage that white supremacy inflicts on everyone s humanity *Teaching and Learning in Higher Education* Beatrice L. Bridglall, 2013-08-28 Concerns with how students are taught and whether and how they learn has become particularly salient in higher education This is evident in growing awareness of increases in time to degree and declines in attainment rates for many students including those who are underrepresented in our nation s community and public and private colleges and universities It is also demonstrated vis vis recent findings that more than a third of college students evinced no noticeable improvement in critical thinking writing and complex reasoning skills after four years as an undergraduate These findings suggest that while a focus on access to and

participation in the nation's colleges and universities remain a prominent goal it is no longer sufficient given persistent disparities in post secondary student learning There are a few models however from which we can distill a set of strategies for promoting not only high achievement but also retention and completion rates This book examines three such models in higher education the Meyerhoff Scholars Program at the University of Maryland Baltimore County the Opportunity Programs at Skidmore College in Saratoga Springs New York and the Premedical Program at Xavier University in New Orleans with a proven record of student achievement and completion
