Michael Landy Michael Landy,Thomas Dane Gallery,2018 The Efficacy of Intimacy and Belief in Worldmaking Practices Urmila Mohan,2023-11-17 This book explores efficacious intimacy as an embodied concept of worldmaking and a framework for studying belief practices in religious and political domains The study of how beliefs make and manifest power through their sociality and materiality can reveal who or what is considered effective in a particular socio cultural context The chapters feature case studies drawn from diverse religious and political contexts in Asia Africa and the Americas and explore practices ranging from ingesting sacred water to resisting injustice In doing so the authors analyze emotions and affects and how they influence dynamics of proximity and distance Taking an innovative approach to the topic of intimacy the book offers a fascinating examination of how life worlds are constructed by material practices It will be of interest to scholars of anthropology religion and material culture *An Introductory Guide to EC Competition Law and Practice* Valentine Korah,1994 The Idea of Waste John Scanlan,2025-03-15 A compelling rumination on detritus as an essential meaningful yet often problematic facet of human existence This book starts with the premise that waste is inevitable in human society and ends with a meditation on its inevitability The Idea of Waste explores how we have grappled with both the material reality and the specter of this shapeshifting phenomenon throughout history utilizing it dreaming of overcoming it yet never escaping it John Scanlan explores what waste is and why it seems to be intrinsic to human life at every turn in every age and epoch Finally he demonstrates how waste never disappears but rather only proliferates anew Scanlan s compelling narrative shows waste to be both an enduring material consequence of human activity and an idea or state of being **Supreme Court** , *Hyperthematics* Marc M. Anderson,2019-06-14 In this innovative work Marc M Anderson presents an account of value and value creation which both defines value and introduces a method to manipulate value practically Using this new methodology Anderson first explores where value lies in experience both human and otherwise uncovering tendencies in human action and the natural world that create and destroy value From that analysis he generates practical principles to be applied in creating value in any region or discipline of human experience at any scale including corporate organization and product design economics the sciences the arts urban and architectural design and sustainable development He tests this methodology by focusing on the organization and production of commercial corporations in particular suggesting ways to

rethink and transform organization product creation and the contemporary currency system He considers the implications for the many intersections of corporate production with human life from urban planning medicine and food production to pornography weaponry and environmental engagement with corresponding suggestions for transformation toward value Throughout Hyperthematics examines complexity the nature of objects the inevitable future intermingling of science and ethics and assumptions driving the contemporary culture wars
