Michael Graves Vincent Joseph Scully, Jr., Michael Graves, 1983-12-01 *Michael Graves* Michael Graves, Vincent Joseph Scully, Karen Vogel Wheeler, Peter Arnell, Ted Bickford, 1983 *Michael Graves* Michael Graves (Architekt), **Michael Graves** Michael Graves, 1999 **Michael Graves** Ian Volner, 2017-10-24 One of the most prominent and prolific designers and architects of the late twentieth century Michael Graves is best known for his popular product designs including the world famous Alessi whistling bird teakettle and controversial buildings such as the Portland Building in Oregon Humana Building in Kentucky and Dolphin and Swan Hotels at Walt Disney World Florida Graves was widely seen as the leading voice of postmodernist architecture which reintroduced human scale color and sometimes playful forms into the stark white vocabulary of modernism Following a devastating illness that paralyzed him from the chest down Graves became a tireless designer and advocate of improved health care products and facilities before his sudden death in 2015 Shortly before this he began a series of interviews with journalist Ian Volner which form the basis of this biography of a remarkable designer Volner also conducted numerous interviews with Graves's family patrons colleagues and friends What emerges is a meticulously researched anecdote rich human story as well as a primer on the American architecture scene of the past sixty years and a portrait of a man whose deep passion for his art brought pleasure to millions *The Familiar and the Unfamiliar in Twentieth-century Architecture* Jean La Marche, 2003 Matching the texts the architects wrote with the buildings they were designing contemporaneously he focuses on the language employed in discussing the subject to reveal the author architects distinct voices and points of view **BOOK JACKET** *The Architectural Project* Alfonso Corona-Martínez, 2003-01-15 An Essay Concerning the Project considers the practice of architectural design as it has developed during the last two centuries In this challenging interpretation of design education and its effect on design process and products Argentinean scholar Alfonso Corona Martinez emphasizes the distinction between an architectural project created in the architect's mind and materialized as a set of drawings on paper and the realized three dimensional building Corona Martinez demonstrates how representation plays a substantial role in determining both the notion and the character of architecture and he traces this relationship from the Renaissance into the Modern era giving detailed considerations of Functionalism and Typology His argument clarifies the continuity in the practice of design method through the nineteenth and twentieth centuries a continuity that has been obscured by the emphasis on changing goals instead of design procedures and examines the influences of modernity and the legend of the Bauhaus Architectural schooling he suggests has had a decisive role in the transmission of these practices He concludes that the methods formalized in Beaux Arts teaching are not only still with us but are in good part responsible for the stylistic instability that haunts Modern architecture Abstract but not abstruse An Essay Concerning the Project provides clear information for a deeper understanding of the process of design and its results More so than any other recent text it shows the scope and richness of the field of speculation in architecture It presents

subtle considerations that must be mastered if an architect is to properly use typology the means of representation and the elements of composition and in architecture Students teachers and practitioners alike will benefit from its warning about the deeper aspects of the endeavor of architecture
