Michel Foucault's Archaeology Of Scientific Reason Science And The History Of Reason:

Michel Foucault's Archeology of Scientific Reason Gary Gutting, 1990 **Michel Foucault's Archaeology of Scientific Reason** Gary Gutting, 1989-09-29 An introduction to the critical interpretation of the work of Michael Foucault **Genesis and Development of French Historical Epistemology** Gerardo Ienna, 2025-04-25 This book forms an important part of the current revival of the debate around the category of historical epistemology The term historical epistemology designates a methodology or research program aimed at building a historically informed theory of knowledge and or a history of science and technology that enhances its epistemological aspects This book offers an original panorama of the French debate surrounding the emergence and consolidation of the intellectual program of historical epistemology over a period ranging from the end of the 19th century to the second half of the 20th century The first section of this book sets out to reconstruct sociologically and historically the processes of circulation of ideas both nationally and internationally that constituted the conditions of possibility for the emergence of the very idea of historical epistemology in the French intellectual context The second section aims instead to highlight the main theoretical positions both epistemological and historiographical that would make it possible to trace a relative unity of intent among the authors who make up the canon of historical epistemology in their oppositional relationship to other intellectual trends Particular attention is also paid to defining a minor canon of this tradition represented by what is known as mathematical thought The third part of the volume focuses instead on reconstructing the anthropological sociological and political perspectives underlying the methodology employed by authors belonging to historical epistemology The three parts combined make for a uniquely broad yet focused book that is of interest to historians philosophers and scientists alike [The Oxford Handbook of Philosophy of Technology](#) Shannon Vallor, 2022 The Oxford Handbook of Philosophy of Technology gives readers a view into this increasingly vital and urgently needed domain of philosophical understanding offering an in depth collection of leading and emerging voices in the philosophy of technology The thirty two contributions in this volume cut across and connect diverse philosophical traditions methodologies and subfields providing the reader with provocative and original insights on the history concepts problems and challenges that mark humanity's attempts to attain deeper and more lasting wisdom about our complex and evolving relationship to technology **Historical Understanding and Ethics in Social Science** Leonidas Tsilipakos, 2025-03-13 Can social scientific description capture the historically individual Is the idea of an ethically committed social science morally defensible This book offers a critical historically grounded perspective on these perennial methodological and ethical problems in their current forms It provides a series of in depth examinations of recent work by prominent authors in sociology and philosophy The book draws on the thought of Peter Winch to provide a coherent response to the core issues that underlie past and present debate in social science and to provide a solid basis for future inquiry It will be of particular interest to social scientists philosophers and historians and to anyone seeking a clear grasp of the demands made by historical understanding

and ethics on the study of society Science and Christian Ethics Paul Scherz,2019-05-09 There is a growing crisis in scientific research characterized by failures to reproduce experimental results fraud lack of innovation and burn out In Science and Christian Ethics Paul Scherz traces these problems to the drive by governments and business to make scientists into competitive entrepreneurs who use their research results to stimulate economic growth The result is a competitive environment aimed at commodifying the world In order to confront this problem of character Scherz examines the alternative Aristotelian and Stoic models of reforming character found in the works of Alasdair MacIntyre and Michel Foucault Against many prominent virtue ethicists he argues that what individual scientists need is a regime of spiritual exercises such as those found in Stoicism as it was adopted by Christianity in order to refocus on the good of truth in the face of institutional pressure His book illuminates pressing issues in research ethics moral education and anthropology **Foucault and the Human Subject of Science** Garðar Árason,2018-10-29 This book offers a clear analysis of Foucault s work on scientific knowledge and its relationship to individuals and society It suggests a way of using Foucault s tools for science criticism and resistance while avoiding the pitfalls of vulgar relativism or irrational anti science views Two cases of scientific conflict are considered The first considers left handers as subjects of science in particular studies which purport to show that left handers die on average younger than right handers The second case considers Icelanders as subjects of science in the context of a partly failed attempt to construct a genetic database encompassing the entire nation The book will be of interest to bioethicists and philosophers who are concerned with the interaction between science and its human subjects as well as scholars concerned with Foucault s work on science Techno-Scientific Practices Federica Russo,2022-10-03 In scholarly debates as well as in everyday parlance we tend to pull science and technology apart science gives us theory and technology applies it In practice however science and technologies are highly intertwined In Techno Scientific Practices An Informational Approach Federica Russo looks at the practice of science and elucidates the role of technologies and instruments in the process of knowledge production In this exercise it becomes evident that technologies cannot be analyzed on their own but always in relation to epistemic agents Thus Techno Scientific Practices emphasizes the importance of analyzing the process of knowledge production in techno scientific contexts in which there is a triad of relations to look at us the instruments and the world The book thus builds bridges between the philosophy of science philosophy of technology and science and technology studies in an unprecedented way Philosophy, Science, and History Lydia Patton,2014-06-27 Philosophy Science and History A Guide and Reader is a compact overview of the history and philosophy of science that aims to introduce students to the groundwork of the field and to stimulate innovative research The general introduction focuses on scientific theory change assessment discovery and pursuit Part I of the Reader begins with classic texts in the history of logical empiricism including Reichenbach s discovery justification distinction With careful reference to Kuhn s analysis of scientific revolutions the section provides key texts analyzing the relationship of HOPOS to the history of science including

texts by Santayana Rudwick and Shapin and Schaffer Part II provides texts illuminating central debates in the history of science and its philosophy These include the history of natural philosophy Descartes Newton Leibniz Kant Hume and du Chatelet in a new translation induction and the logic of discovery including the Mill Whewell debate Duhem and Hanson and catastrophism versus uniformitarianism in natural history Playfair on Hutton and Lyell de Buffon Cuvier and Darwin The editor s introductions to each section provide a broader perspective informed by contemporary research in each area including related topics Each introduction furnishes proposals including thematic bibliographies for innovative research questions and projects in the classroom and in the field

within the humanities **Hitler's Geographies** Paolo Giaccaria, Claudio Minca, 2016-04-21 17 What Remains Sites of Deportation in Contemporary European Daily Life The Case of Drancy Katherine Fleming Acknowledgments Contributor Biographies Index **The Diffusion of Power in Global Governance** S. Guzzini, I. Neumann, 2012-10-14 The study of global governance has often led separate lives within the respective camps of International Political Economy and Foucauldian Studies Guzzini and Neumann combine these to look at an increasingly global politics with a growing number of agents recognising the emergence of a global polity **Foucault, Christianity and Interfaith Dialogue** Henrique Pinto, 2020-11-25 Foucault Christianity and Interfaith Dialogue develops a new model for interfaith dialogue using the work of the French historian of ideas Michel Foucault The author argues that it is the injustice done to the Other by Roman Catholic Protestant and other centred and unitary models of religious pluralism that allows the introduction of Foucault's de-centring of transcendence and human reason as an alternative model for understanding religious diversity and the role it ought to play in the constitution of the self and the making of society This Foucaultian approach provides a new direction for interfaith dialogue in the modern world and leads to an ethical rather than a nihilistic position while fostering a non unitary theology of religious pluralism and an open textured process of self transformation The author's original and imaginative application and expansion of Foucault's concept of the More from *The Archaeology of Knowledge* 1969 makes important and original contributions to academic work on Foucault and contemporary theology [The Cambridge Companion to Foucault](#) Gary Gutting, 2005-07-18 For Michel Foucault philosophy was a way of questioning the allegedly necessary truths that underpin the practices and institutions of modern society He carried this out in a series of deeply original and strikingly controversial studies on the origins of modern medical and social scientific disciplines These studies have raised fundamental questions about the nature of human knowledge and its relation to power structures and have become major topics of discussion throughout the humanities and social sciences The essays in this volume provide a comprehensive overview of Foucault's major themes and texts from his early work on madness through his history of sexuality Special attention is also paid to thinkers and movements from Kant through current feminist theory that are particularly important for understanding his work and its impact This revised edition contains five new essays and revisions of many others and the extensive bibliography has been updated *Homer, Parmenides, and the Road to Demonstration* Benjamin Folit-Weinberg, 2022-06-09 Demonstrates how the invention of extended deductive argumentation by Parmenides depended on his use of poetic road imagery *Making Modern Science, Second Edition* Peter J. Bowler, Iwan Rhys Morus, 2020-08-17 In this new edition of the top selling coursebook seasoned historians Peter J Bowler and Iwan Rhys Morus expand on their authoritative survey of how the development of science has shaped our world Exploring both the history of science and its influence on modern thought the authors chronicle the major developments in scientific thinking from the revolutionary ideas of the seventeenth century to contemporary issues in genetics physics and more Thoroughly revised and expanded the second edition draws on the

latest research and scholarship It also contains two entirely new chapters one that explores the impact of computing on the development of science and another that shows how the West used science and technology as tools for geopolitical expansion Designed for entry level college courses and as a single volume introduction for the general reader Making Modern Science presents the history of science not as a series of names and dates but as an interconnected and complex web of relationships joining science and society

The Oxford Handbook of Continental Philosophy Brian Leiter, Michael Rosen, 2009-10-22 The Oxford Handbooks series is a major new initiative in academic publishing Each volume offers an authoritative and up to date survey of original research in a particular subject area Specially commissioned essays from leading figures in the discipline give critical examinations of the progress and direction of debates Oxford Handbooks provide scholars and graduate students with compelling new perspectives upon a wide range of subjects in the humanities and social sciences The Oxford Handbook of Continental Philosophy is the definitive guide to the major themes of the continental European tradition in philosophy in the nineteenth and twentieth centuries Brian Leiter and Michael Rosen have assembled a stellar group of contributors who provide a thematic treatment of continental philosophy treating its subject matter philosophically and not simply as a series of museum pieces from the history of ideas The scope of the volume is broad with discussions covering a wide range of philosophical movements including German Idealism existentialism phenomenology Marxism postmodernism and critical theory as well as thinkers like Hegel Marx Nietzsche Freud Heidegger and Foucault This Handbook will be an essential reference point for graduate students and professional academics working on continental philosophy as well as those with an interest in European literature the history of ideas and cultural studies

Routledge History of Philosophy Volume VIII Richard Kearney, 2003-12-23 Continental philosophy as it has emerged in the twentieth century is less a seamless fabric than a patchwork of diverse strands Phenomenology hermeneutics existentialism structuralism critical theory deconstruction these are some of the salient movements which have developed in continental Europe between 1900 and the 1990 s though their influence is by no means confined to geographic location Continental thought has proved highly exportable circulating far beyond the frontiers of Europe to provoke strong responses in the intellectual world at large The fifteen articles in this volume outline and assess some of the issues and experiments of continental philosophy The first five span the twin movements of phenomenology and existentialism running from Husserl and Heidegger to Sartre Merleau Ponty and Levinas Subsequent essays deal with specific currents of continental thought in such areas as science Marxism linguistics politics aesthetics feminism and hermeneutics A final chapter on postmodernism highlights the manner in which so many concerns of continental thought culminate in a radical anti foundationalism This volume provides a broad scholarly introduction to this period for students of philosophy and related disciplines as well as some original interpretations of these authors It includes a glossary of technical terms and a chronological table of philosophical scientific and other cultural events
