When I received the review copy I was rather excited the book as a collection of research papers that in themselves are very interesting and provide a fast track into the literature of the subject in question it is a worthwhile purchase to support thinking on entrepreneurship and innovation in a world where the sustainability agenda is increasingly becoming the agenda for inventors entrepreneurs and those who fund them or invest in their companies All the papers are well written and scholarly A particularly strong feature of the chapters is the range of sources quoted at the end of each chapter These references provide pathways into many different literatures that might save much time for subsequent researchers Lorraine Warren International Journal of Entrepreneurial Behaviour and Research In recent years our understanding of corporate sustainability has moved from exploitation to exploration from corporate environmental management to sustainable entrepreneurship and from efficiency to innovation Yet current trends indicate the need for radical innovation via entrepreneurial start-ups or new ventures within existing corporations despite difficulties with the financing and marketing of such efforts Presenting both conceptual and empirical research this fascinating book addresses how we can combine environmental and social sustainability with economic sustainability in order to produce innovative new business models The international cast of contributors addresses the wide range of issues in the balance between growth and environmental concerns The first five chapters discuss various aspects of sustainable entrepreneurship This is followed by two chapters that look at innovation within existing firms Innovation is not successful until it finds a customer so the two chapters that follow delve into the marketing aspects of business to consumer and business to business settings The book closes with a broad discussion of the evolution and future of the research agenda into the intersection of sustainability innovation and

entrepreneurship Academics students business professionals and NGOs will find this volume enlightening and useful
