Dancing with the Dragon Dennis Hickey,Baogang Guo,2010-04-30 For the past several decades China has been transforming itself from an isolated and backward agrarian society into an economic superpower with global interests and responsibilities Over 300 million Chinese have been lifted out of poverty and China now enjoys the fastest growing and third largest economy on earth Not surprisingly numerous changes in China s foreign relations have accompanied the astounding transformations in the country s domestic politics and society Perhaps most surprising to some observers is Beijing s aggressive foray into the so called developing world This co edited book focuses on China s increasing engagement with many of the less developed countries particularly those in Africa Latin America Southeast Asia Central Asia and the Middle East and explores the current and future trends in Beijing s foreign relations The old and hackneyed call for revolutionary struggle and world revolution has been consigned to the dustbin of history In its place is a concrete pledge to construct a win win relationship with any country willing to deepen ties with Beijing Dancing with the Dragon will help readers gain a greater understanding of China s foreign relations in this critical part of the global community *1991 Britannica Book of the Year* Daphne Daume,1991 Describing the events and advances of knowledge in 1990 this volume also includes recently

revised Encyclopaedia Britannica articles and a Britannica World Data statistical section A Solar Manifesto Hermann Scheer, 2021-12-16 In the decade since the Earth Summit in Rio de Janeiro the response of the world's governments and authorities to the threats to the global environment has been to enforce the reduction of energy consumption and harmful emissions solutions primarily based around conventional energy resources and conventional thinking The question is though whether this strategy is radical enough to address the key challenges how facing the environment and whether it can be effective in avoiding catastrophe on a global scale For Herman Scheer the answer is a definite no In this fully updated edition of A Solar Manifesto he once more attacks the lack of political will to find answers outside a conventional frame of reference Climate change pollution deforestation destruction of the ozone layer poverty and the population explosion are all problems created or exacerbated by the use of conventional energy Seven years after the first edition of this book answers are now more urgently required than ever as current policies serve merely to alleviate the escalating symptoms rather than attempting a cure for what could become a terminal affliction Herman Scheer shows that this crisis may yet be reversed but it can only be made to happen through a fundamental change in political and economic strategies paving the way towards a global solar energy economy sustained by new social principles A Solar Manifesto champions the replacement of fossil and nuclear fuels with solar energy as a real solution to the threat to the environment and associated social consequences Scheer constructs a radical yet innovative political and economic model and argues the case with passion and conviction for the global solar economy as the route to a sustainable environment Thought provoking and profoundly challenging this book will be an inspiration to anyone concerned with energy and the global environment **The Development of China's**
