Rainforest Birds:

Birds of Tropical America Steven Hilty, 2010-07-05 The guide to neotropical bird behavior that picks up where field guides leave off Why are tropical birds like parrots and quetzals so much more colorful than those in more temperate climates How can a vulture soaring thousands of feet above the canopy spot a dead rodent no bigger than a mouse on the rainforest floor What permits sparrow sized antbirds to not only survive but to thrive among relentless hordes of army ants that devour every other living thing in their path Steven Hilty has led birding tours to the American Tropics for decades By providing answers to the hundreds of questions asked by participants of these expeditions Hilty has produced a natural history of the bird life of the New World Tropics that is at once practical accurate and as endlessly fascinating as the species whose lives it reveals Birds of Tropical America was published by Chapters Publishing in 1994 and went out of print in 1997 UT Press is pleased to reissue it with a new epilogue and updated references

Nature-based Tourism and Conservation Clement Allan Tisdell,Clevo Wilson,2012-01-01 This book tackles the two edge sword of non consumptive wildlife tourism on net does it add to or detract from species conservation The book does so with a treasure trove of original survey research on the supply and demand for wildlife tourism on both public and private lands from Antarctica to rainforests to marine wildlife The economic analysis is one of the first to apply new behavioral economics to analyzing tourists choices John Loomis Colorado State University US Does nature based tourism help or hinder biodiversity conservation The answer provided by this authoritative volume is that it depends on context and type of tourism and is no easy panacea Indeed it can result in an under supply of nature conservation from an economic point of view This book provides an excellent synthesis supported by case studies of the tourism conservation trade off problem it will appeal to both academic and practitioner audiences R Kerry Turner CBE University of East Anglia UK This book encapsulates a lifetime

s scholarly work between the authors It sets out the platform upon which nature based tourism may be discussed and debated which it then enriches by a series of case examples mostly drawn from personal experience In doing so it performs a valuable service to all interested in this field by capturing those detailed insights into nature based tourism that are often only acquired by experience Stephen Wanhill Editor Tourism Economics In today s world even nature seems to have to pay its own way Nature based Tourism and Conservation provides detailed real life examples of how this is working in various parts of the world from rainforests to Antarctica and how the tradeoffs can best be measured Clem Tisdell and Clevo Wilson provide a unique economic perspective to the various issues involved providing practical illustrations of how others can incorporate the various ways of considering costs and benefits when deciding how to define the role nature based tourism when planning conservation measures This book will be useful to a wide range of audiences from national protected area agencies to private land owners who are establishing their own nature based tourism enterprises Jeffrey McNeely International Union for Conservation of Nature Switzerland Nature based Tourism and Conservation unearths new or neglected principles relevant to tourism and recreational economics environmental valuation and economic theory Its three parts have chapters on nature based tourism and its relationships to conservation including case studies dealing with the consequences of World Heritage listing of natural sites Antarctic subtropical and tropical national park based tourism and an NGO s conservation efforts modelled on ecotourism The final part focuses on tourism utilizing particular wildlife including sea turtles whales penguins royal albatross glow worms and tree kangaroos Australian Vegetation R.
