Explorations in Child Psychiatry E. Anthony, 2013-11-11 It is a great pleasure for me to write a foreword to this fine work by many different collaborators under the aegis of my friend and one time colleague in Geneva Dr E James Anthony because it represents a collective effort toward a goal that today seems very necessary yet difficult to attain This goal is the synthesis of developmental psychology with all the other aspects of child psychology into a science of ontogenetic development from birth to maturity encompassing three points of view the biological the behavioral and the internalization of the behavioral into mental life This synthesis is indeed necessary since it is not possible to understand a disorder or a developmental arrest without having a sufficient knowledge of the ensemble of elements that has brought it about At each level of development the personality of the subject attempts to integrate a multiplex system of factors in varying proportion and without carefully and fully considering this interdigitating whole it is not easy to disentangle the mechanisms involved in any particular functional disintegration

The Child, 1968 **Primary Care of the Child With a Chronic Condition E-Book** Patricia Jackson Allen, Judith A. Vessey, Naomi Schapiro, 2009-06-25 Written by nurse

practitioners for nurse practitioners this one of a kind resource provides the expert guidance you need to provide comprehensive primary care to children with special needs and their families It addresses specific conditions that require alterations in standard primary care and offers practical advice on managing the major issues common to children with chronic conditions A consistent format makes it easy to locate essential information on each condition Plus valuable resources help you manage the issues and gaps in health care coverage that may hinder quality care This is the only book authored by Nurse Practitioners that focuses on managing the primary health care needs of children with chronic conditions More than 60 expert contributors provide the most current information available on specific conditions Comprehensive summary boxes at the end of all chronic conditions chapters provide at a glance access to key information Resource lists at the end of each chronic condition chapter direct you to helpful websites national organizations and additional sources of information that you can share with parents and families Updated references ensure you have access to the most current evidence based coverage of the latest research findings and management protocols Four new chapters Celiac Disease Eating Disorders Muscular Dystrophy and Obesity keep you up to date with the latest developments in treating these conditions Autism content is updated with the latest research on autism spectrum disorders including current methods of evaluation identification and management Coverage of systems of care features new information on how to help families obtain high quality and cost effective coordinated services within our complex health care system Easy to find boxes in the chronic conditions chapters summarize important information on treatment associated problems clinical manifestations and differential diagnosis
