Region and Nation James Brennan, 2003-01-30 The study of twentieth century Argentine history is undergoing a radical transformation Both Argentine and U S historians of Argentina are recasting the great debates in the historiography by challenging the Buenos Aires centered focus of most of the existing historical scholarship and offering a new perspective on the country s modern history Argentina s supposed exceptionalism is being challenged by these historians The persistence of political clientilism and oligarchic rule enclave economies and pre capitalist social relations the role of traditional institutions such as the Church and family intense class conflict and working class militancy all approximate Argentina closer to the Latin American experience than the previous historiography would suggest This book is a unique collaboration between Argentine and U S historians of this other Argentina

So Far from Allah, So Close to Mexico Theresa Alfaro-Velcamp, 2009-06-03 Middle Eastern immigration to Mexico is one of the intriguing untold stories in the history of both regions In *So Far from Allah So Close to Mexico* Theresa Alfaro Velcamp presents the fascinating findings of her extensive fieldwork in Mexico as well as in Lebanon and Syria which included comprehensive data collection from more than 8 000 original immigration cards as well as studies of decades of legal publications and the collection of historiographies from descendants of Middle Eastern immigrants living in Mexico today Adding an important chapter to studies of the Arab diaspora Alfaro Velcamp's study shows that political instability in both Mexico and the Middle East kept many from fulfilling their dreams of returning to their countries of origin after realizing wealth in Mexico in a few cases drawing on an imagined Phoenician past to create a class of economically powerful Lebanese Mexicans She also explores the repercussions of xenophobia in Mexico the effect of religious differences and the impact of key events such as the Mexican Revolution Challenging the post revolutionary definitions of mexicanidad and exposing new aspects of the often contradictory attitudes of Mexicans toward foreigners *So Far from Allah So Close to Mexico* should spark timely dialogues regarding race and ethnicity and the essence of Mexican citizenship

Chimneys in the Desert Fernando Rocchi, 2005-12-23 This book offers new topics and new perspectives on the economic history of Argentina before the 1930 Depression It focuses on the evolution of early industrialization in a country primarily associated with cattle ranching and agriculture and single mindedly characterized as a case of a successful export economy Taking an original approach the book cross examines traditional economic issues such as production and finances and new cultural patterns such as consumption the role of women paternalism and ideology The first years of Argentina's industrialization from the 1870s to the 1920s coincided with a time of great innovation a brisk turn from tradition and quick modernization This book shows that industry not only helped Argentina's economy along but spearheaded its modernization It challenges the long lasting canonical version that industry was a victim of a capital market and a state extremely hostile to manufacturing Access to financing for industrial endeavors was much easier than previously thought while the state supported industry through tariffs
