Regionalization In A Globalizing World A Comparative Perspective On Forms Actors And Processes:

Regionalization in a Globalizing World Michael Schulz, Fredrik Soderbaum, Joakim Öjendal, 2001-05 The emerging role of regional systems of relations is an important feature of the new global politics While the European Union is the most advanced case most other parts of the world display at least the beginnings of regional systems Using a multidisciplinary approach the contributors examine these processes from a comparative perspective concentrating on the following questions what constitute a region how is the historical process of region formation unfolding what motives and factors underlie this drive to regionalisation what forms a regional awareness and institutionalisation are emerging and where what are the future prospects *Globalising the Regional, Regionalising the Global: Volume 35, Review of International Studies* Rick Fawn, 2009-04-30 A collection of leading international scholars examine the concept of regions from a range of perspectives and assess leading contemporary examples Regionalisation and Global Governance Andrew F. Cooper, Christopher W. Hughes, Philippe De Lombaerde, 2007-12-21 The relationship between global governance and regionalization is fraught with ambiguity Understanding regionalization in this context requires an understanding of its relationship and reactive condition with both the constellations of global governance and globalization This book presents an overview and explores the distinctive but intersecting trajectories of regionalization and global governance It surveys the theoretical debates the economic dimensions multinationals trade and investment and labour the security considerations armed conflict conflict prevention and peacekeeping and non traditional security in Asia the governing structures managing contemporary multilevel architecture and cultural policy leadership and the L 20 The expert and multi disciplinary editors and contributors survey the context as well as the general character of these projects together with their links as both parallel mediating mechanisms and distinctive choices for interjecting governance into globalization Examining these projects in tandem amplifies their importance and enables the contributors to tease out coincidental as well as alternative possibilities in policy direction This book will be of interest to students and scholars of international relations area studies international economics international political economy political science public administration and development studies The New Regionalism in Africa Fredrik Söderbaum, 2017-03-02 This edited volume transcends conventional state centric and formalistic notions of regionalism and theorizes conceptualizes and analyzes the complexities and contradictions of regionalization processes in contemporary Africa The collection not only unpacks and theorizes the African state society complex with regard to new regionalism but also explicitly integrates the often neglected discourse of human security and human development In so doing the book moves the discussion of new regionalism forward at the same time as it adds important insights to security and development It is organized into three parts Part I theorizes conceptualizes and analyzes the new regionalism in Africa from the point of view of the region e g West East Central and Southern Africa The national perspectives in Part II focus on the new regionalism in Africa from the point of view of particular countries or specific state society complexes such as Kenya

the Democratic Republic of the Congo DRC the enclave of Cabinda Angola and Zambia Part III contains two concluding chapters that tie the main threads of the volume together theoretically and empirically and discuss the contribution of the analytical framework the new regionalism approach NRA to the larger study of regionalism *Globalization, Regionalization and Cross-Border Regions* M. Perkmann, N. Sum, 2002-07-12 Cross border regions are newly emerging social spaces stretching across national borders Globalization makes national borders more permeable and leads to a rearrangement of economic and political interactions This is particularly pronounced within supra regional blocs featuring specific internal border regimes The ensuing opportunities are increasingly seized to create border spanning discourses and institutions This is illustrated in the book by a range of experts analyzing cross border regions in Europe America East Asia and Africa

Theories of New Regionalism F. Söderbaum, T. Shaw, 2003-11-11 Theories of New Regionalism represents the first systematic attempt to bring together leading theories of new regionalism Major theorists from around the world develop their own distinctive theoretical perspectives spanning new regionalism world order approaches along with regional governance liberal institutionalism neoclassical development regionalism to regional security complex theory RSCT and the region building approach **Brazil, the United States, and the South American Subsystem** Carlos Gustavo Poggio Teixeira, 2012-07-30 The United States has often acted as an empire in Latin America Nevertheless there has been an obvious dissimilarity between U S actions in South America and U S actions in the rest of Latin America which is illustrated by the fact that the United States never sent troops to invade a South American country While geographic distance and strategic considerations may have played a role they provide at best incomplete explanations for the U S s relative absence south of Panama The fact that the United States has had a distinct pattern of interactions with South America is thus not captured by the typical concept of Latin America In Brazil the United States and the South American Subsystem Regional Politics and the Absent Empire Carlos Gustavo Poggio Teixeira recuperates the virtually neglected literature on regional subsystems In so doing Teixeira maintains that researchers of inter American relations would greatly benefit from a characterization reflecting actual regional realities more than entrenched preconceptions Such a characterization involves subdividing the Western Hemisphere in two regional subsystems North and South America This subdivision allows for uncovering regional dynamics that can help explain the U S s limited interference in South American affairs compared to the rest of Latin America This book argues that the role of Brazil as a status quo regional power in South America is the key to understanding this phenomenon Through a historical analysis focusing on specific cases spanning three centuries this research demonstrates that Brazil regardless of particular domestic settings has deliberately affected the calculations of costs and benefits of a more significant US involvement in South America While in the past Brazil has taken actions that resulted in increasing the benefits of the U S s limited involvement in South America in more recent times it has sought to increase the costs of a more significant U S presence Teixeira then considers some of the theoretical and political implications of the framework laid out

by this research Brazil the United States and the South American Subsystem is a groundbreaking investigation of U S Latin American relations and the politics of imperialism

The Theoretical and Practical Dimensions of Regionalism in East Asia Karolina Klecha-Tylec,2016-11-29 This book provides a comprehensive overview of developments in East Asian regionalism combining qualitative evidence with empirical quantitative analysis It argues that two dominant processes have formed East Asian regionalism 1 regionalization and 2 inter regionalism Klecha Tylec examines the differences between traditional and new regionalisms as they apply to East Asia the differences between East Asian and European regionalism the role of the United States in shaping regional links and the evolution of the three key structures of ASEAN ASEAN 3 and Asia Summits The book is unique for examining together the network zonal and geospatial dimensions of relations in East Asia as they apply at micro regional sub regional macro regional trans regional and inter regional levels The book offers a detailed analysis of intra regional links and the hybrid relationships between micro regions and nation states

Regionalism, Globalisation and International Order Jens-Uwe Wunderlich,2016-03-23 New regionalism and globalization have been prominent themes in academic and political debates since the beginning of the 1990s Despite the considerable amount of scholarly attention that the new regionalism has received in recent years its full empirical and theoretical potential has yet to be fully investigated This illuminating study provides an overview of new avenues in theorizing regionalism and proposes a consolidated framework for analysis and comparison Offering a comparative historical perspective of European and Southeast Asian regionalism it presents new and imaginative insights into the theory and practice of regionalism and the links between regional developments globalization and international order

Security and International Law Mary E Footer,Julia Schmidt,Nigel D White,Lydia Davies-Bright,2016-06-16 Of the many challenges that society faces today possibly none is more acute than the security of ordinary citizens when faced with a variety of natural or man made disasters arising from climate and geological catastrophes including the depletion of natural resources environmental degradation food shortages terrorism breaches of personal security and human security or even the global economic crisis States continue to be faced with a range of security issues arising from contested territorial spaces military and maritime security and security threats relating to energy infrastructure and the delivery of essential services The theme of the book encompasses issues of human political military socio economic environmental and energy security and raises two main questions To what extent can international law address the types of natural and man made security risks and challenges that threaten our livelihood or very existence in the twenty first century Where does international law fall short in meeting the problems that arise in different situations of insecurity and how should such shortcomings be addressed
