Competition and Regulation in the Postal and Delivery Sector Michael A. Crew, Paul R. Kleindorfer, 2008-01-01 Worldwide postal and delivery economics has attracted considerable interest. Numerous questions have arisen including the role of regulation, funding the Universal Service Obligation, postal reform in Europe, Asia, and North America, the future of national postal operators, demand and pricing strategies, and the principles that should govern the introduction of competition. Collected here are responses to these questions in the form of 24 essays written by researchers, practitioners, and senior managers from throughout the world. This volume will have a broad appeal with an audience ranging from practitioners in the express and delivery industry, national Postal Operators, and managers to economists, regulators, competition lawyers, marketers, scholars in economic regulation, and institutional libraries. **Public Sector Economics** Jörg

Finsinger, 1983-06-30 **Regulatory Choices** Richard J. Gilbert, 2023-11-15 *Regulatory Choices* offers the first comprehensive economic history of energy policy and its consequences for California, where some of the most innovative and far-ranging programs of regulatory reform have originated. The authors of this volume have gathered together an impressive wealth of material about actual policy decisions and their repercussions, and have subjected their findings to astute economic analysis. This book will serve for years to come as an invaluable reference on the costs and effects of various energy policies. With its focus on bringing prices in alignment with the true cost of producing power and delivering it to the customer, the first part of the book outlines the issue of setting utility rates and considers some of the proposals to provide regulated industries with incentives to respond to economic and environmental concerns. The problems of energy supply occupy the second part of the book, which includes a survey of the costs of alternative energy sources and estimates of their environmental impacts, as well as a case study of the construction of the Diablo Canyon nuclear power plant. The book concludes by documenting the results of subsidy programs that were designed to target the development of wind power and residential energy conservation. Regulators we learn, have a mixed record when it comes to managing the production of energy. Some conservation programs have enjoyed considerable economic success, particularly those that correct a lack of consumer information. Others, such as the renewable energy tax credits or programs designed to subsidize new technologies, have cost much more than the value of the energy they have saved. What emerges clearly from this study is that regulated industries are not immune from the forces of competition. This title is part of UC Press's *Voices Revived* program, which commemorates University of California Press's mission to seek out and cultivate the brightest minds and give them voice, reach, and impact. Drawing on a backlist dating to 1893, *Voices Revived* makes high-quality, peer-reviewed scholarship accessible once again using print-on-demand technology. This title was originally published in 1991. **Powering**

**China: Reforming the Electric Power Industry in China** Xu Yi-chong, 2018-02-05 This title was first published in 2002.

This study of the Chinese electric power industry examines the ownership and the restructuring of the industry The reform of the electric power industry is also seen as part of the wider economic development that has been taking place in China thus providing fresh perspectives on the changes taking place in both the economy and society more generally Presenting a wealth of extensive research on the subject the book elucidates the power struggle between political and bureaucratic elite and explains the sensitive and volatile relationship between the central and provincial government against an increasingly complex global background

**Social Ethics and Normative Economics** Marc Fleurbaey, Maurice Salles, John A. Weymark, 2011-04-11 This collection of thirteen essays on social ethics and normative economics honouring Serge Christophe Kolm's seminal contributions to this field addresses the following questions How should the public sector price its production and services What are the normative foundations of criteria for comparing distributions of riches and advantages How should intergenerational social immobility and inequality in circumstances be measured What is a fair way to form partnerships How vulnerable to manipulation is the Lindahl rule for allocating public goods What are the properties of Kolm's ELIE tax proposal Would the addition of EU level income taxes enhance equity How should we compare different scenarios for future societies with different population sizes How can domain conditions in social choice theory be justified using Kolm's epistemic counterfactuals How can Kolm's distributive liberal contract be implemented What are the implications of norms of reciprocity for the organization of society The answers to these questions give major insight into the state of the art of social ethics and normative economics and are thus an indispensable source for researchers in both of these fields

*The Economic Effects of Airline Deregulation* Steven Morrison, Clifford Winston, 2010-12-01 In 1938 the U S Government took under its wing an infant airline industry Government agencies assumed responsibility not only for airline safety but for setting fares and determining how individual markets would be served Forty years later the Airline Deregulation Act of 1978 set in motion the economic deregulation of the industry and opened it to market competition This study by Steven Morrison and Clifford Winston analyzes the effects of deregulation on both travelers and the airline industry The authors find that lower fares and better service have netted travelers some 6 billion in annual benefits while airline earnings have increased by 2.5 billion a year Morrison and Winston expect still greater benefits once the industry has had time to adjust its capital structure to the unregulated marketplace and they recommend specific public policies to ensure healthy competition
