Piers Vitebsky

Reindeer People Living With Animals And Spirits In Siberia:

The Reindeer People Piers Vitebsky, 2006 Cambridge anthropologist Piers Vitebsky the first westerner to live with the Eveny of Siberia since the Russian revolution brings readers an extraordinary case of survival in one of the most inhospitable places on Earth of photos **Khanty, People of the Taiga** Andrew Wiget, Olga Balalaeva, 2011-05-15 Drawing on nearly twenty years of fieldwork as well as ethnohistory politics and economics this volume takes a close look at changes in the lives of the indigenous Siberian Khanty people and draws crucial connections between those changes and the social cultural and political transformation that swept Russia during the transition to democracy Delving deeply into the history of the Khanty who were almost completely isolated prior to the Russian revolution the authors show how the customs traditions and knowledge of indigenous people interact with and are threatened by events in the larger world **Sentient**

Entanglements and Ruptures in the Americas: Human-Animal Relations in the Amazon, Andes, and Arctic

, 2023-08-28 This book draws together anthropological studies of human animal relations among Indigenous Peoples in three regions of the Americas the Andes Amazonia and the American Arctic Despite contrasts between the ecologies of the different regions it finds useful comparisons between the ways that lives of human and non human animals are entwined in shared circumstances and sentient entanglements While studies of all three regions have been influential in scholarship on human animal relations the regions are seldom brought together This volume highlights the value of examining partial connections across the American continent between human and other than human lives *Hoofprints on the Land* Ilse Köhler-Rollefson, 2023-01-05 Perfect for fans of English Pastoral and Wilding *Hoofprints on the Land* shows that herding cultures are not a thing of the past but a regenerative model for our future *Hoofprints on the Land* is a fascinating and lyrical book exploring the deep and ancient working partnerships between people and animals UN advocate and camel conservationist Ilse Köhler-Rollefson writes a passionate rallying cry for those invisible and forgotten herding cultures that exist all over the world and how by embracing these traditional nomadic practises we can help restore and regenerate the Earth Ilse has spent the last 30 years living with and studying the Raika camel herders in Rajasthan India and she shows how pastoralists can address many of the problems humanity faces Whether it be sheep cattle reindeer camels alpacas goats or yaks this ancient and natural means of keeping livestock challenges the myth that animal free agriculture is the only way forward for a healthy planet From the need to produce food more sustainably and equitably to the consequences of climate change land degradation and loss of biodiversity we can learn from pastoralists to help repair the human relationship with livestock to return to a model of intelligent cooperation rather than dominance As Ilse writes Herding is therapy not just for the planet but also for our souls Historical Dictionary of Shamanism Graham Harvey, Robert J. Wallis, 2015-12-15 A remarkable array of people have been called shamans while the phenomena identified as shamanism continues to proliferate This second edition of the *Historical Dictionary of Shamanism* contains with examples from antiquity up to today and from

Siberia where the term shaman originated to Amazonia South Africa Chicago and many other places Many claims about shamans and shamanism are contentious and all are worthy of discussion In the most widespread understandings terms seem to refer particularly to people who alter states of consciousness or enter trances in order to seek knowledge and help from powerful other than human persons perhaps spirits But this says only a little about the artists community leaders spiritual healers or hucksters travelers in alternative realities and so on to which the label shaman has been applied This second edition contains a chronology an introduction and extensive bibliography The dictionary contains over 500 cross referenced dictionary entries on individuals groups practices and cultures that have been called shamanic This book is an excellent access point for students researchers and anyone wanting to know more about Shamanism **Animalkind** Jean Kazez,2009-12-01 By exploring the ethical differences between humans and animals Animalkind establishes a middle ground betweenegalitarianism and outright dismissal of animal rights A thought provoking foray into our complex and contradictoryrelationship with animals Advocates that we owe each animal due respect Offers readers a sensible alternative to extremism by speakingof respect and compassion for animals not rights Balances philosophical analysis with intriguing facts andengaging tales **Humans and Other Animals** Prof. Samantha Hurn,2012-04-20 What are our attitudes towards other animals and how does this affect our humanity This work of anthrozoology explores the myriad and evolving ways in which humans and animals interact the divergent cultural constructions of humanity and animality found around the world and individual experiences of other animals This book looks at case studies covering blood sports such as hunting fishing and bull fighting pet keeping and petishism eco tourism and wildlife conservation working animals and animals as food It addresses the idea of animal exploitation raised by the animal rights movements as well as the anthropological implications of changing attitudes towards animal personhood and the rise of a posthumanist philosophy in the social sciences more generally *Nature and Bureaucracy* David Jenkins,2022-09-08 This book questions how bureaucracies conceive of and consequently interact with nature and suggests that our managed public landscapes are neither entirely managed nor entirely wild and offers several warnings about bureaucracies and bureaucratic mentality One prominent challenge facing scientists policymakers environmental activists and environmentally concerned citizens is to recognize that human influence in the natural world is pervasive and has a long history How we act or choose not to act today will continue to determine the future of the natural world Western style management of nature mediated by economic rationality and state bureaucracies may not be the best strategy to maintain environmental integrity The question is what kinds of human influence conceived of in the widest possible sense will produce ideal environments for future generations The related question is who gets to choose The author approaches the problem of analyzing the mutual influence of human and natural systems from two perspectives as an objective scholar investigating bureaucracies and natural systems from the outside and over the last decade as an inside practitioner working in various roles in federal land management agencies developing policies and

regulations involved in the control of natural systems This book will be of great interest to students and scholars of natural resource management policy and politics and professionals working in environmental management roles as well as policymakers involved in public policy and administration Natural Resource Extraction and Indigenous Livelihoods Emma Gilberthorpe, Gavin Hilson, 2016-04-22 This book provides an extended analysis of how resource extraction projects stimulate social cultural and economic change in indigenous communities Through a range of case studies including open cast mining artisanal mining logging deforestation oil extraction and industrial fishing the contributors explore the challenges highlighted in global debates on sustainability Corporate Social Responsibility CSR and climate change The case studies are used to assess whether and how development processes might compete and conflict with the market objectives of multinational corporations and the organizational and moral principles of indigenous communities Emphasizing the perspectives of directly affected parties the authors identify common patterns in the way in which extraction projects are conceptualized implemented and perceived The book provides a deeper understanding of the dynamics of the human environments where resource extraction takes place and its consequent impacts on local livelihoods Its in depth case studies underscore the need for increased social accountability in the planning and development of natural resource extraction projects *Spirit Possession and Trance* Bettina E. Schmidt, Lucy Huskinson, 2011-11-03 Spirit possession is a phenomenon that often elicits a response of fear particular in those who are ignorant of its meaning and role within its particular religious and cultural traditions Possession by divine beings such as spirits or gods is however a key practice in religions worldwide It is therefore important to gain an understanding of this practice in its cultural context before trying to develop a wider theory about it This fascinating book contains several case studies that present new interpretations of spirit possession worldwide The authors show the diversity of possible interpretations and methodological approaches that provide a new insight into the understanding of possession and trance
